# ©RDER SHEET. <br> THOMAS J. GREY \& COMPANY, <br> BOSTON, MASS. 

QuANTITY.

# Greeting 

DURING the past season our business has increased to such an extent we have been obliged to lease additional space in the adjoining building, 30 South Market Street, which will enable us to carry a more complete line of goods and place us in a better condition to take care of the wants of our patrons.

We take this opportunity to thank our friends and patrons for the many favors, and we desire to say that we will use every endeavor to please them and all others who favor us with orders, large or small.

The efforts to establish a reputation for dealing in FIRST QUALITY GOODS ONLY have met with success, and we are confident that by pursuing the same course in the future, as we have in the past, our business will continue to increase, and our methods will meet with approval from all discriminating purchasers.

Careful tests of our Seeds have been made to ascertain their growth. Testing has always been practiced by us and is one of our many methods to maintain a high standard of quality.

We are the Only House in New England carrying a full stock of Seeds, Tools, Implements and Repairs for the wants of the Retail Trade Exclusively. Cheap goods for country store trade we do not handle. Personal attention to business, prompt shipments, reasonable prices, First Quality Goods, have built up a business and given a reputation of which we are proud. The same course will be pursued in future to maintain that reputation as was in the past used to obtain it.

## SITUATIONS WANTED.

We will be pleased at all times to receive inquiries from any person desiring the services of Gardeners, Farmers or Assistants. We keep a list of reliable persons wanting such situations, and recommend only such as we think are competent to meet the requirements of employer. We make no charge for our services.

We inform all former patrons that we can, and will, use them just as well in the future, and we trust that those who have not yet traded with us will give us a trial.

Yours truly,
THOMAS J. GREY \& CO.

## Remarks to Purchasers.

Send Early Orders and there will be no cause for complaint at delays in their execution.

Orders from Unknown Parties, to insure prompt attention, must be accompanied by a remittance, or by satisfactory reference to some responsible house or person in this city.

Our Terms are Net Cash. All bills on which short credits are allowed are due the first of the month succeeding the date of purchase. Bills on which longer time is desired must be provided for by special agreement.

Prices, Etc. As prices of some varieties of seeds will doubtless vary during the year, we beg to assure purchasers that ours shall be at all times as low as any for seeds of like good quality. Quotations, with samples, will be cheerfully given for such variable articles as grass and clover seeds, onion sets, etc.

Remittances may be made by Draft, Money Order, American Express Company's Money Order, Cash by Express, or in Registered Letter. Postage Stamps may be sent for moderate amounts.

Seeds by Mail. We send all seeds ordered at ounce or packet rates, free of charge for postage. All heavy seeds, including peas, beans, corn, clover seed, seed grain, roots, etc., are quoted at net prices at our store. Purchasers desiring these by mail are requested to remit an additional amount sufficient to cover the postage at the rate of 8 cents per pound, or 15 cents per quart.

Address, Etc. In ordering, please use the order sheet which we send with each catalogue, and be particular to sign your name, also that of your post office, county and state, plainly; also mention the mode of conveyance you prefer.

Liberal Premium on Seeds in Packets When the order is accompanied by the money, purchasers of seeds in packets at catalogue prices may select 25 cents worth extra packets for each $\$ 1.00$ sent. Thus, any one enclosing $\$ 1.00$ may order seeds in packets amounting to $\$ 1.25$. Two Dollars sent us with the order will pay for seeds in packets amounting to $\$ 2.50$, and so on. Please remember this discount applies on packets only.

Cloth Bags used in Packing are charged at the following rates: Quarter bushel, 8 cents; half bushel, 10 cents; one bushel, 15 cents; two bushels, 20 cents. If returned, clean and in good condition, free of expense, they will be credited as charged. In remitting for seeds by the peck and over, please add a sum to cover cost of the necessary bags.

Our Guarantee: While we exercise the greatest care to have all seeds pure and reliable, we do not give any warranty, express or implied. If the purchaser does not accept the seeds on these terms and conditions, they must be returned at once, and the money that has been paid for same will be refunded.

Kindly send us a list of your friends who use seeds and bulbs, and we will be pleased to mail them our catalogues. Our new Bulb Catalogue will be ready in September.

When seeds are ordered to be sent by mail, customers will please remit eight cents per pound or fifteen cents per quart, to cover cost of postage, except for packets and quantities less than one quarter pound, which יse will mail free of postage.

## ARTICHOKE. (Artischoke.)

## One ounce will produce 500 plants.

The Globe Artichoke is cultivated for its flower-heads, which are cooked like Asparagus. Plants set in any good garden soil, about three feat apart, with slight covering in winter, will remain in bearing a long time.

> Pkt. Oz. Lb.

Large Green Globe. The best variety; heads large and scales tender and excellent
$\begin{array}{lll}.05 & .30 & 3.00\end{array}$
Jerusalem Artichoke. (Helianthus tuberosus). Cultivated for its tubers.

Qt., . 20 Peck, 1.00

## ASPARAGUS. (Spargel.)

One ounce will produce 200 plants.
A deep, rich, mellow soil is best adapted to the growth of asparagus. It may be grown from seed or propagated by roots. Sow as early in the Spring as the ground will admit, in drills from twelve to fourteen inches apart, and cover one inch deep; when the plants are well up, thin to three inches apart in the drills. Keep the plants free from weeds during Summer, and protect slightly during Winter.

The following Spring, the roots will be ready to transplant into permanent beds; the roots should be set in rows three to four feet apart, and one foot apart in the rows; the crown of the root should be four to six inches below the surface of the ground. A fair crop may be expected the third year from the seed, or in one to two years when roots are used, according to the age of the roots planted. By planting two-year old roots a fair crop may be obtained in one year, and after that a full crop every year.

Two-year old Asparagus Roots are too bulky to send by mail. The prices quoted for one-year old roots include postage; two-year old roots by express at the expense of the purchaser.

## BEANS, DWARF OR BUSH. (Busch-Bohnen.)

One quart will plant 100 feet of drill. One and one-half bushels will plant one acre.

A warm, light soil is best adapted to the growth of Bush Beans, but they will do well in almost any situation, uniess it be very wet. Sow two inches deep in drills three to three and one-half feet apart; keep the ground free from weeds and cultivate often. Never disturb the vines when wet, as the pods will become rusty. All the varieties are tender, and must not be planted until the soil is dry and warm.

## WAX PODDED VARIETIES.

## Pkt. Qt. Peck.

Davis's Kidney Wax. Plant vigorous, and of compact upright growth, with pods extra long, straight, oval, of a clear, waxy, white color, often seven to eight inches in length, and when fit for use quite stringless . . Lima Wax. The pods are of a beautiful light lemon color, broad and flat; tender and of fine flavor, very prolific Golden Wax. The standard variety for general use; pods long, broad and flat, very fleshy, and of finest quality. Vines erect and robust, hardy and productive -
Golden Eye Wax. The leading market variety; the pods are entirely free from rust; a good yielder and very early.
Wardwell's Kidney Wax. Very long, tender pods; straight and very handsome. Vines large, vigorous and productive .
Black Wax. Early, very tender and of good quality
Currie's Rust-Proof. Pods long, flat, straight, and of a waxywhite color; quality excellent
Thorburn's Refugee Wax. Earliest wax bean in cultivation;
whith long, round, yellow pods; an immense yielder . .
White Wax. Waxy pods; flat, stringless and prolific

The best English variety; very hardy . . . 10 . 402.00 Prolific Tree. A very productive small white baking bean . . . 10 . 25 1.75

## BEANS-Pole or Running; (Stangen Bohnen.) <br> One quart will plant about 150 hills.

All under this head require poles six to eight feet
 long, and should not be planted until the ground is warm, as they are more tender than the dwarf varieties. Plant about the middle of May, if the season is suitable. The Lima Beans are very susceptible of cold and wet, and apt to rot in the ground, and should not be planted until all danger from frost is over, and the soil is dry and warm.

Ford's Mammoth. This is the largest of all the Limas; the pods are of enormous size and containing from 5 to 8 beans
Dreer's Improved Lima. A great Lima, being more productive and of better quality

Pkt. Qt. Peck.
$.40 \quad 2.25$
Large White Lima. One of the best shell beans grown; matures in ninety days, very popular. Our seeds of this variety are extra selected, large, fine
Sieva, or Small Lima. Earlier than the large Lima, with pods and beans much smaller; quality very good
King Horticultural. The best Pole Bean, very early and remarkably productive. The long, beautifully-colored pods hang in rich clusters. As an early shell bean it is unequaled for tenderness and delicious flavor
Brockton Pole. A strong, vigorous, productive variety of horticultural bean. Pods 5 to 6 inches long, broad, curved and splashed with bright crimson, making them very attractive
Pole Horticultural. An old favorite; equally good as a snap or shell bean
Red Cranberry. Very productive. Pods large, very tender, and almost stringless
Improved Kentucky Wonder. Excellent, very productive. Pods a silvery-green color, of large size and entirely stringless
Mont D'Or, or Golden Butter. A strong, vigorous grower, with pods six to eight inches long, in clusters, very thick and fleshy; bright golden yellow and of best quality
Golden Cluster, Dreer's. Pods a beautiful golden yeliow, from six to eight inches long, produced in clusters of four to six. The earliest of the pole wax beans, and very productive. Quality excellent.2.25

Dutch Case Knife. Very early and prolific; fine shelled, green $\underset{\text { or dry }}{\text { ot }}$ Runner. A great favorite, both ornamental and useful. Bright scarlet flowers. Used both as a string and shelled bean

## BEET. (Runkel Rube.)

One ounce will sow 50 feet of drill; five to six pounds for an acre
A deep, light, sandy loam that has been well enriched is best adapted to the growth of the beet. Sow in drills, from April to June, sixteen inches apart, and about one inch deep; thin the plants to about six inches apart. The turnip-rooted are the best, and all early varieties are used extensively for greens.

ECLIPSE BEET.

Grey's Blood Turnip. One of the very best strains for Market Gardeners; small top, round, handsome, and very dark red. Pkt. ธ̌. Oz. 10c. Lb. 75c.

Eclipse. Early globe shaped, dark red, small top, smooth roots.

> Pkt. 5c. Oz. 10c. Lb. 60c.

Edmands. Deep blood-red color, round and smooth; excellent quality; highly recommended. Pkt.5c. Oz. 10c. Lb. 60c. Dirigo. A rich blood-red variety, of fine grain and flavor. Extra early.

Pkt. 5c. Oz. 10c. Lb. 75c. Pkt. Oz. Lb.
Crosby's Egyptian. One of the earliest dark-red varieties; fine quality. Very popular among Market Gardeners. . . . 05
Columbia. Round and smooth, deep red; early and very tender. . 05 . 10 . 75
Dewing's Blood Turnip. Of fine form and flavor, deep blood red. A desirable variety
Bassano. Early, flat, light color, standard variety . . . . 05 . 10 . 50
Bastians. Of quick and large growth; bright red color . . . 05 . 10 . 50
Long Smooth Blood. Large, late; deep blood-red; best for Winter use; sweet and tender
.05 .10
Swiss Chard. The leaves of this variety are used as spinach, and the mid rib of the leaf, cooked and served up like asparagus, is delicious
.05 . 10 . 75
Beet for Greens. The small plants make delicious greens

## SUGAR BEETS and MANGEL WURZEL.

Six pounds of seed will sow one acre.
Lane's Improved Sugar Beet. Large, hardy, productive and excellent quality. Oz. 10c. Lb. 40c.
Silesia White Sugar Beet. Grows to a large size, and is useful for making sugar, as well as for stock-feeding. Oz. 10c. Lb. 40c.
Grey's Prize Long Red Mangel. The most largely grown of any of the Mangels; roots attain an enormous size, producing thirty to fifty tons to the acre; quality superior; the best for deep soil. Oz. 10c. Lb. 40c.
Golden Tankard Mangel. The flesh is bright goldenyellow; very large, and will produce more mangels to the acre than any other variety; excellent for feeding stock. Oz. 10c. Lb. 40c.
Gianc Yellow Intermediate Mangel. A very large yellow sort, of good quality, and produced in great abun-
 dance. Oz. 10c. Lb. 40c.
Yellow Globe. A large, round, orange colored variety of excellent quality: good keeper; best for shallow soil. Oz. 10c. Lb. 40c.
Red Globe. Similar to the above except in color . . . Oz. 10c. Ib. 40c.

## BORECOLE, or KALE. (Blatter Kohl.)

## One ounce will produce 1500 plants.

Of all the cabbage tribe this is the most tender and delicate, and would be much more extensively grown than it is if its excellent qualities were more generally known. Early plants may be started in the hot-bed, or the seeds may be sown in the open ground in April or May; transplant in June, into rows, and cultivate the same as cabbage.

## BROCCOLI. (Spargel Kohl.)

One ounce will produce 2,000 plants.
This vegetable closely resembles the cauliflower. A very rich deep soil is required to grow the broccoli to perfection; the seed should be sown early in the Spring, and the plants transplanted into rows three feet apart with two feet between the plants.

## BRUSSELS SPROUTS. (Sprossen Kohl.)

One ounce will produce 2,000 plants.
Cultivated for the small heads that grow from the main stem; these small heads are firm and compact like little cabbages, and are considered a great delicacy by many people. Cultivate the same as cabbage or cauliflower.

## CABBAGE. (Kopfkohl.)

One ounce produces about 3,000 plants.
For early use a sowing may be made in the hot-bed in February or March; and for Winter use seed should be sown in the open ground in May or June. When the plants are five or six inches in height, transplant into rows three to three and one-half feet apart, setting the plants from two to three feet apart in the rows, according to the variety. A deep rich loamy soil is best adapted to the growth of this crop, and if large fine heads are expected, the land must be prepared by very heavy manuring. A handful of wood ashes thrown into the forming heads will not only keep off the cabbage-fly, but will assist the growth of the plants to a considerable extent. To preserve cabbages during the Winter, pull
 them on a dry day, and bury them in long trenches in a dry place, and cover with boards to keep off the rain.

## CABBAGE.-Continued.

Early Jersey Wakefield. One of the most popular, early pointed varieties, good grower; substantial heads
Pkt. Oz. ..... Lb. ..... $\begin{array}{lll}.05 & .25 & 2.50\end{array}$Large Wakefield. This strain is about one week later thanearly Jersey Wakefield, but the heads are fully one-half larger;will not burst when ripe$.05 \quad .25$2.50
Early Winningstadt. Pointed variety; both for early and late sowing; popular in this market ..... 05 .....  25 ..... 2.50
Henderson's Early Summer. A few days later than Wakefield,rather larger, and more globe-shaped; much used by marketgardeners; stands long in head05 . 252.50
All=Seasons. An early drumhead sure heading, solid variety. Desirable for early or fall use ..... $.05 \quad .25$ ..... 2.50
All-Head. Earliest of the large cabbages; heads uniformly solid. Splendid sort ..... 10 ..... 30 ..... 3.00
Fottler's Brunswick. The standard market variety; a drumhead; grows to a large size; solid, tender, good shape, and a goodkeeper10 303.00
Premium Flat Dutch. A popular and highly esteemed late variety; its keeping qualities are unsurpassed ..... 05 .....  25 ..... 2.50
Stone Mason. One of the oldest and best known varieties; large size; drumhead; grown principally as a late cabbage, and for Winter keeping ..... 10 ..... 35 ..... 3.50Autumn King. The heads are of enor- mous size and very solid. It has few outer leaves, and owing to this fact, it is claimed that it will produce a greater weight of crop from the same space of ground than most other late cabbages. Pkt. 5c. Oz. 25 c . Lb. $\$ 2.50$.
Marblehead Mammoth. The largest known variety; drumhead; sometimes growing to weigh over fifty pounds; reliable header. Pkt. 5c. Oz. 25c. Lb. $\$ 2.50$.

Excelsior. A distinct sort. Plants rather

AMERICAN IMPROVED SAVOY CABBAGE. long stemmed, but compact; the leaves are very smooth, but thick; the head is of medium Pkt. oz. size, round and very solid. Matures quite late and keeps well. This is one of the hardiest cabbages and endures both frost and drouth that would destroy other sorts.
American Improved Savoy. The favorite curled Savoy cabbage of finest quality, and an excellent keeper
Globe Curled Savoy. A variety with finely curled leaves, and of delicate flavor; used for fall crop or for winter . 05 $25 \quad 2.50$

Mammoth Red Rock. The largest and surest heading red Cabbage;
heads as large and solid as Flat Dutch and fine grained $.05 \quad .30 \quad 3.00$
Red Dutch Pickling. Used extensively for pickling purposes; tender, medium size

## CARROT. (Moehre.)

One ounce will sow 100 feet of drill; three pounds required for one acre.
The carrot flourishes best in a good, light, well-enriched loam. Where there is a choice of situations, heavy and wet soils should be avoided, and preference given to the light and dry. For an early crop sow as soon as the ground is in good working condition; plantings for general crop may be made as late as June, but early sowings succeed best. The early, small-sized varieties may be sown in drills ten inches apart, but the larger sorts require at least eighteen inches between the rows; cover three-quarters of an inch deep, and when the plants are well up, thin to six inches apart in the rows. As an agricultural root, the carrot is unsurpassed for feeding stock.

Early Scarlet Horn. A medium-sized root, half-long, of fine color, and much used for cooking; grown for early use, and to sell in bunches
Guerande. Intermediate in length; fully three to five inches in diameter; fine quality
Danvers Half=Long. The best variety for general crop; is of rich color and a good keeper; yields largely and is easily harvested
$.10 \quad 1.25$

Improved Long Orange. The best known and most largely cultivated of any carrot; excellent for stock or table use; roots deep orange, twelve to fifteen inches long
Improved Short White. The largest and heaviest cropping carrot known; the roots are short, very heavy at the shoulder, of uniform shape and smooth; light green color above ground, white beneath; flesh rich, white, solid, crisp, and of sweetest flavor
1.00

## CAULIFLOWER. (Blumen Kohl.)

## One ounce will produce 3.000 plants.

The cauliflower, like the cabbage, requires a deep, rich soil, and seldom succeeds well when grown on land long under cultivation. Sow the seed in the hot-bed in March, and transplant into the garden in May; set the plants in rows and cultivate the same as cabbage. If the season is dry, water often, as cauliflowers cannot be grown to perfection without plenty of moisture.

Early Snowball. A favorite early variety, very sure to head;
considered by many the best variety in cultivation .
Pkt. Oz. $\quad 1 / 4 \mathrm{Lb}$.
$\begin{array}{lll}20 & 3.50 & 12.00\end{array}$ with large, white, compact heads of finest quality with large, white, compact heads of finest quality
$\begin{array}{lll}.20 & 3.00 & 10.00\end{array}$
Early Dwarf Danish. A choice strain that comes to maturity very evenly; a favorite for first crop with many growers . . . 20
Early Paris. One of the best, either for early or late crops . . . 10
$3.00 \quad 10.00$
Lenormand's Short-Stem. A large, late, short-stemmed variety, with well-formed white heads of excellent quality .
$\begin{array}{lll}.10 & 1.00 & 2.50\end{array}$
Veitch's Autumn Giant. Heads very large, white and compact: well protected by foliage; will remain suitable for use a long time time

## CELERY. (Seleri.)

One ounce will produce about 4,000 plants.
Sow the seeds in March or April in a hot-bed or cold frame. As soon as the plants are three inches high, transplant into a prepared border, setting them four inches apart. When grown six inches, and fine stocky plants, set in richly-manured, deep soil, in rows three and a half feet apart, and about nine inches from plant to plant. Water, if dry weather follows transplanting. During the next two months all the attention required is to keep down weeds. Afterwards earth up a little, and continue doing so at intervals until only the tops of the leaves are visible late in autumn. Never hoe or earth up when the plants are wet.
Boston Market. The finest-flavored variety Pkt. Oz. I/4 Lb.
in cultivation; solid, crisp, and of excel-
lent, nutty flavor; dwarf, branching habit; blanches perfectly white; a splendid keeper
Early Arlington Celery. Very early, large, and easily blanched

| .10 | .40 | 1.25 |
| :--- | :--- | :--- |

White Plume. Best for early use; the stalks and portions of the leaves being naturally white, are fit for table early in the season
.10
. 30
1.00

Golden Self=Blanching. The earliest variety; color rich goldenyellow; crisp, tender, and of fine flavor; keeps well throughout the season
Giant Pascal. This splendid variety is a sport from the wellknown "Golden Self-Blanching," carefully selected. It partakes of the fine nutty flavor of that variety; the stalks are thick, solid and crisp, golden-yellow heart
Sandringham Dwarf White. The dwarfest white variety, solid and crisp
New Rose. The finest of its class. Fine flavor, solid, crisp, and entirely free from stringiness; a splendid variety for late use
Dwarf Crimson. Crisp, tender and delicious; stalks beautifully rose-tipped
Improved Turnip=Rooted, or Celeriac. A variety of celery having turnip-shaped roots, which may be cooked, sliced, and used in vinegar, also in soup; cultivated as celery
Celery Seed. For flavoring

## CORN SALAD, or FETTICUS. (Ackersalat.)

Cne ounce will sow 100 feet of drill.
This excellent salad may be had the year round. Sow in September, in drills eight inches apart, covering the seeds lightly and protect from frost by a light covering of hay or litter. The seed may also be sown in spring.
Large $=$ Seeded. The most popular variety grown. Pkt. 5 cts. Oz. 10 cts. Lb. $\$ 1.00$.

## CRESS, or PEPPERGRASS. (Kresse.)

One ounce will sow 100 feet of drill.
A popular salad, which should be sown early in spring-very thickly in shallow drills-and at short intervals, for succession, as it soon runs to seed.
Extra Curled. The best variety grown; leaves are beautifully cut and curled; highly prized for garnishing. Pkt. 5 cts . Oz. 10 cts. Lb. 60 cts.
Water. This wholesome salad may be grown in any moist situation, but more successfully by the edge of a running brook. The seed may be sown in May, on the ground where it is intended to be grown, and the thinnings transplanted. The plants should be set not less than a foot apart. The cress will be fit for gathering the second year. Pkt. 10 cts . Oz. 40 cts .

## CHERVIL. (Kerbel.)

The Curled Chervil is cultivated like Parsley, and used for garnishing and flavoring soups and salads.
Curled Chervil. The young leaves are used for flavoring soups and salads. Pkt. 5 cts. Oz .20 cts Lb. $\$ 2.00$.

## CORN.-Sweet, or Sugar. (Welschkorn.)

One quart will plant 200 hills; eight quarts will plant one acre in hills. One and one-nalf bushels wlll sow one acre, in drills for solling.

STOWELL'S EVEBGREEN.

Corn requires a mellow, loamy, well-pulverized soil, and frequent hoeings. Plant in hills three feet apart each way, dropping five or six kernels in each hill, or planted in rows three to four feet apart, and the plants thinned out to eight or nine inches in the row. From the beginning of May until the middle of July a succession planting can be made every two or three weeks, and by properly selecting the varieties a continued supply can be had until frost kills plants.
Grey's Perfection. Earlier than Crosby, grows taller and has much larger ears, very productive, sweet and tender. Especially recommended for market gardeners
Pkt. Qt. Peck.
Early Crosby. A popular variety; early, good size, and quick growth; white kernels, and one of the best for market gardeners
Early Cory. A very early variety, with good-sized ears and large grains; excellent for market
Cory White Cob. A selection from Red Cory, being equally as
early and having white kernels and white cob
Country Gentleman. Cob very small, with deep kernels of pearly1.25 whiteness. The finest of all sweet corns; quality delicious.
Black Mexican. One of the sweetest and best varieties; grains
black when ripe, but when in condition for the table cooks
Black Mexican. One of the sweetest and best varieties; grains
black when ripe, but when in condition for the table cooks remarkably white
Country Gentleman. Cob very small, with deep kernels of pearly1.50
Potter's Excelsior. Fine large ears and deep grain; one of the sweetest varieties; popular with canners
Moore's Early Concord. Large handsome ears; quality faultless, being much like early Crosby1.25
Stowell's Evergreen. The finest late variety; ears twelve to sixteen-rowed, very large and remains fit for use longer than any other; the stalks are very tall and valuable for fodder
Zig=Zag Evergreen. About ten days earlier than Stowell's; color
$\mathbf{Z i g}=\mathbf{Z a g}$ Evergreen. About ten days earlier than Stowell's; color
$\underset{\text { pure white }}{\text { lent quality }}$ productive and attractive in appearance; excel-
Zig $=\mathbf{Z a g}$ Evergreen. About ten days earlier than Stowell's; color
pure white, productive and attractive in appearance; excel-
lent quality
$.10 \quad .25 \quad 1.25$
Egyptian. A large, late, long-eared variety; very sweet; remains green a long time; excellent for canning .
Evergreen Sweet Fodder. Sowed largely in this vicinity for feeding green to milch cows, or dried for Winter fodder. $\$ 1.00$ peck; $\$ 3.00$ per bush.
.10 . 25
$.25 \quad 1.25$

## CORN, Field and Fodder.

## Prices subject to change.

Early Canada. One of the earliest varieties; ear small; in ordinary seasons the crop will be fully ripened in August

Longfellow. This is the standard variety in this section; long ear, small cob, bright color, and medium early
Early Sandford. Very early, ears white; makes a fine quality of meal; good for fodder and ensilage.
King of the Earliest. The earliest yellow Dent Corn in cultivation; a safe sort for high latitude or late planting
Leaming. Early yellow dent variety, with large, deep grain of dark orange color; makes very fine meal
Grey's Mammoth Ensilage. This corn will yield a larger crop of green fodder than any variety we offer for soiling or ensilage purposes; short-jointed, and consequently yields an immense amount of leaves and ears
.10 . 001.50
Blount's Mammoth Ensilage. A tall-growing, late variety, with numerous leaves; produces immense crops, the best for ensilage

## CORN, FIELD AND FODDER.-Continued.

White Southern. A common white variety, grown here consider- Qt. Peck. Bus. ably for soiling purposes, sown either broadcast or in drills $\quad .10$. 50 1.50
Evergreen Sweet Fodder. For cutting green and feeding to stock this variety excels all others in tenderness, sweetness and nutriment. Also popular as a silo variety
$\begin{array}{lll}.15 & 1.00 & 3.00\end{array}$
Rice Pop. Regarded as the most tender pop-corn in use; kernels pointed, cob small, ears well filled at the end. Per Lb., . 05
Pearl Pop. Good sized ears, very tender and delicious. PerLb., . 05

## CUCUMBER (Gurke.)

One ounce will plant about 50 hills. One and one-half pounds to one acre.

WHITE SPINE CUCUMBER

For very early use seed may be started in heat and the plants set out in May. Pieces of inverted sod are an excellent medium for starting and growing early Cucumber plants, as they can be readily lifted from the hot-bed to the garden without disturbing the young plants growing upon them. For main crop, plant in hills four feet apart, in the end of May. Make the hills rich with well-rotted manure, and keep the young plants safe from the striped bug by dusting with dry plaster, or powdered hellebore. Leave 4 strong plants to each hill.
Early Russian. Earliest variety known; hardy and Pkt. Oz. Lb. productive; fruit small, quality fine for pickling or slicing
Early Frame or Short Green. Medium size, very early and good for pickling and slicing .
Early Cluster. Fruit small and borne in pairs; light green, and a great bearer; a standard sort
Everbearing. Begins to fruit very early, and continues to blossom and set fruit until killed by frost; good as a pickler or slicer
$.10 \quad .20 \quad 2.00$
Boston Pickling. The best pickling variety yet introduced; yery productive; quick growing, superior color and quality; the most popular variety among the market gardeners
Arlington White Spine. One of the finest Cucumbers for forcing and one of the most perfect in shape, size, color and quality and is very brittle and crisp
Improved White Spine. The best variety for table use or for market; retains its color a long time after being picked; very productive

| .10 | .20 | 1.75 |
| :--- | :--- | :--- |

Emerald. A fine type of White Spine, sets fruit early, and its vigorous vines abound in long, straight, handsome fruits; crisp and tender; excellent for slicing and pickling. Pkt. 10c. ; three for 25c.
Long Green. Prickly; firm, crisp; grows to considerable size; long; dark green; excellent table variety
Tailby's Hybrid. Valuable for forcing; grows uniformly straight and smooth; a cross between the White Spine and an English Frame variety
Japanese Climbing. Fruit about ten inches long; thick and of fine flavor. Skin dark green, flesh pure white; can be grown on trelises and fences
Green Prolific. Used principally for pickling purposes; grows very abundantly; dark green color; medium size; popular
West India Gherkin. Used for pickling purposes; a small, ovalshape variety; has the appearance of a burr
$.15 \quad 1.50$
. 25

## ENGLISH FRAME VARIETIES. (For Forcing.)

Sow in small pots in January or February, in the hot-bed or green-house. When the plants have made three leaves, transplant into a previously prepared hill in the center of a hot bed, and cover with a glass sash. Keep a temperature of from sixty-five to eighty degrees. The following are very desirable varieties:
Rollison's Telegraph.
Lord Kenyon's Favorite.
Tender and True.
Duke of Edinburgh.
Carter's Model.
Blue Gown.
Pkt., 25 cents each.

## DANDELION. (Lowenzahn)

One ounce will sow 200 feet of drill; one pound will sow an acre.

Extensively used as early spring greens, and considered very healthful. Sow seed in May or June, in any good soil, in drills fifteen inches apart, upon beds made smooth with the rake. Cover very lightly and press the earth firmly upon the seed. Cultivate during the summer to keep down the weeds. Cover with litter upon the approach of severe weather, and remove the covering early in spring. If spare frames are at hand, they may be used to advantage by setting them over a portion of the bed, and forcing the dandelions under them, thus forwarding a portion of the crop. Dandelions make an excellent salad if blanched by earthing-up, or placing boards to exclude the light.
American Improved. A stocky, thick leaf, hardy variety, grown largely for the Boston market; the best for general use. Pkt. . 10 ; Oz. . 40 ; Lb. 4.50.

## EGOPLANT. (Eirpflange.)

One ounce will produce 1,000 plants.
Sow in hotbeds very early in spring, and transplant when two inches high into a second bed or into small pots. If that is not done, thin to four inches apart. Do not plant out till the weather becomes perfectiy settled and warm. Cool nights or wet weather will check them. Keep some back in frames for a second planting, in case of weather changing unexpectedly. Keep plants watered for a few days if the sun is hot when put out. Set out plants 3 feet by 2 .
Black Pekin. Fruit globular, almost black in color, fine grained, and delicately flavored. Pkt. 10 cts. Oz .40 cts.
Early Long Purple. $\boldsymbol{A}$ very early, hardy and productive variety of good quality. Pkt. 10c. Oz. 25 c .
New York Improved. The best sort for general culture, and leading market variety; fruit large oval, very productive. Pkt. $10 \mathrm{cts} . \mathrm{Oz} .40 \mathrm{cts}$.

NEW YORK IMPROVED.

ENDIVE. (Endivien.).

## One ounce will sow 150 feet of drill.

A rather moist soil is preferred. Sow early in the Spring in drills twelve inches apart, and thin out the plants to ten inches apart in the drill as soon as they are large enough to handle. Before using the plants must be blanched, which is accomplished by gathering the leaves to a point at the top and tying them together with matting or any soft material. It makes a most delicious salad.

Green Curled. A very hardy, dark green, closely curled variety, tender and crisp.

Pkt. Oz. Lb.

Moss Curled. Beautifully curled, and when well developed resembles a tuft of moss; the most ornamental of all
$.05 \quad .20$
2.00

Broad-Leaved Batavian. Leaves very broad; color light green; requires to be tied up for blanching; used principally in soups

## KOHL=RABI.

## One ounce will sow 200 feet of drill.

This vegetable, the popularity of which is rapidly increasing, combines the virtues of the turnip and cabbage, but excels both in nutritive, hardy and productive qualities. The seed may be sown in June in rows eighteen inches apart, and the plants thinned out to eight or ten inches.
White Vienna. The earliest and best table or market variety. Pkt. 5cts. Oz. 25cts. Lb. $\$ 2.00$.
Purple Vienna. Similar to the preceding, except in color, which is of a bluish purple. Pkt. 5 cts. Oz. 25 cts. Lb. $\$ 2.00$.

## LEEK. (Lauch.)

One ounce will sow 100 feet of drill.
The Leek is very hardy, and easily cultivated; it succeeds best in a light, but well-enriched soil. Sow as early in Spring as practicable, in drills one inch deep and one foot apart. When six or eight inches high, transplant in rows ten inches apart each way, as deep as possible, that the neck, being covered, may be blanched.
American Flag. The most desirable for market or family use. Pkt. 5 cts. Oz. 30 cts. Lb. $\$ 3.00$.
Musselburgh. A very large variety of superior quality. Pkt. 5 cts. Oz. 30 cts. Lb. $\$ 3.00$.

## LETTUCE. (Lattich Salat.)

One ounce will produce about 3000 plants.

Lettuce succeeds best in rich and comparatively moist soil, and is most crisp and tender if grown in cool, moist weather. The more rapidly the plants are grown, the more tender and brittle will be their quality. For early use, sow under glass, in February or March, and transplant into a previously prepared hot-bed; rows at least twelve inches apart, according to the varieties. Sowings may be made in the open ground as soon as all danger from frost is over; and if a continuous supply is desired during the season, make sowings every two or three weeks, until September.
All the Year Round. A valuable variety; and compact, with small,frames or open ground planting; always produces large, solidheads,

Boston Curled. A variety highly esteemed for earliness, beauty of form, and good qualities; rich green color; beautifully curled
Boston Market. One of the best for forcing, as well as for outside use; forms fair-sized heads,
Deacon. A splendid variety for standing the summer heat; large, solid heads, tender, crisp and sweet,
Defiance. One of the best summer varieties, remaining crisp and tender for a long time,
Denver Market. The heads are large, solid, light green, beautifully curled, very crisp and tender,
Hanson. A superior, curled heading variety of large size, sweet, tender, and crisp, even to the outer leaves; beautiful green color without, white within; free from any bitter taste; either for Summer or for forcing,
Hittinger's Belmont Forcing. A choice strain for forcing. Much larger than the White-Seeded Tennisball, and a little later. Quality excellent,
Iceberg. A solid-heading large variety of excellent quality,

| .10 | .40 | 4.00 |

MUSK MELON. (Melone.)
One ounce will plant 60 hills, twe to three pounds for an acre.
Cultivate in hills, which should be five to six feet apart each way, and composed of light, moderately rich soil. The hills should be dug about two feet square, eighteen inches deep, and half filled with wellrotted manure, which must be thoroughly incorporated with the soil. Plant in May, ten seeds to the hill, and when the plants are well up, thin out to three. Cultivate until the vines cover the ground, and pinch the ends of the growing shoots to induce early fruiting.
Arlington Nutmeg. Skin deep green, finely netted, flesh greenish- Pkt. Oz. $\quad 1 / 1 \mathrm{lb}$. yellow ; rich and sugary
Banquet. Beautifully netted, medium sized; flesh rich salmon;cantaloupe in cultivation; lucious and sweet; very hardy.

Casaba. One of the largest and best melons; flesh green, very sweet, melting and delicious25
Emerald Gem. Small, extra early; smooth ribbed dark green skin, and orange flesh; quality first rate; very sweet ${ }^{\text {E }}$ ..... 75

Extra Early Hackensack. Large size, round shape, deeply ribbed, roughly netted; flesh green, very sweet, and highly flavored.
Long Island Beauty. On style of Hackensack. The earliest and finest in quality, and the most beautiful Musk Melon
.10 . 25 .40

Long Yellow. Well known standard variety; deeply ribbed; flesh, salmon-color; thick and sweet
$.05 \quad .10$ .75

Miller's Cream. Nearly round in shape, light green netted skin with yellow flesh. Quality good 30
Montreal Nutmeg. A thick-fleshed melon of delicious flavor; ..... 40skin densely netted
Surprise. Early; oblong, with rich orange flesh of good quality.40
Triumph. Flesh red, thick and luscious, ripens clear to the rind; medium size and beautifully netted. .....  30
White Japan. Early, with light green flesh and white skin .....  30
Mango. Used exclusively for pickling; shape, oblong; color, very dark green ..... 25
WATER MELON. (Wasser Melone.)
One ounce will plant 30 hills. Four pounds will plant one acre.
Cultivate in the same manner as Musk Melons, but plant eight to ten feet apart

Black Spanish. A sweet and delicious variety; fruit round, of large size; skin blackish green; scarlet flesh. Pkt., 5c.; oz., 10c.; 1/4b., 25c.

Cuban Queen. Beautifully striped, dark and light green; vigorous in growth; flesh bright red, solid, luscious, crisp and sugary. Pkt., 5c.; oz., 10c.; 1/11. le, 25c.

## WATER MELON.-Continued.

## MUSHROOM. (Champignon.)

One pound of spawn is sufficient for nine square feet of bed. If wanted by mail, add 10 cents per lb. for postage.

Mushrooms are more easily cultivated than many people imagine, and may be grown in any dark room or cellar where the temperature can be mantained at from fifty to sixty-five degrees. For the bed, use a mixture of horse droppings and good fresh loamin equal proportions. Before being placed in the bed let this material be thoroughly mixed, and well turned three or four times to sweeten in some dry place. Upon a dry, firm bottom, proceed to make the bed, by spreading a thin layer of the prepared mixture and pound it firm till the bed is eight inches thick. Leave it thus for about a week, or till the temperature of the bed has subsided to ninety or ninety five degrees. Then make holes about ten inches apart, and put in each a piece of spawn about the size of an egg. Cover the holes and press the soil solid and smooth. Let the bed remain in this condition ten days. Then cover with two inches of fresh loam. Over this place a few inches of straw. If the temperature is right, mushrooms wiil appear in six to eight weeks from time of spawning. The bed will continue bearing about a month. After the firs't crop is gathered, spread over the bed an inch of fresh loam, and moisten with warm water. In the event of the surface of the bed getting very dry at any time, it suould be moistened freely with water at a temperature of eighty to eighty-five degrees.
Our Celebrated English Milltrack Mushroom Spawn (made by the best maker in Eng!and especially for our trade) has gained an enviable reputation among critica. growers for its uniform good quality, and can be thoroughly relied on to produce a good crop of the best mushrooms. Lb. 12 cts. 50 lbs .5 .00 . 100 lbs. \$9.00.

## MUSTARD. (Senf.) <br> One ounce will sow 50 feet of drill.

As an ingredient, the green Mustard imparts a delightfully pungent flavor to the various forms of prepared salads. For early crops the seed may be sown in a hot-bed in March, and for general crop at frequent intervals through the spring, in drills from eight to twelve inches apart.
White. The best variety for salads; the seed is also used medicinally, and as a seasoning for pickles. Pkt. 5 cts. Oz. 10 cts Lb. 40 cts.
Brown. An esteemed sort for culinary use. Pkt. 5 cts. Oz. 10 cts. Lb. 30 cts.
New Chinese. Leaves twice the size of the white mustard; stems more succulent, of deeper green; flavor pleasantly sweet and pungent. Pkt. 5 cts. Oz. 15 cts. Lb. $\$ 1.00$.

## NASTURTIUII or INDIAN CRESS.

One ounce will sow 20 feet of drill.
The Nasturtium is both ornamental and useful, the tall variety forming a showy and graceful climber, and the dwarf an exceedingly beautiful and attractive border flower, while the young seeds of either, when pickled, furnish an excellent substitute for capers. Sow the seeds in drills one inch deep; the tall should be grown by the side of a fence or supported by a trellis.
Tall. Excellent for covering fences or trellis-work,

## OKRA or GUIIBO. (Essbarren.)

One ounce will sow 40 feet of drill.
This plant is extensively cultivated for its green pods, which are used in soups and stews, and are very wholesome and nutritious. Sow about the middle of May, in drills three feet apart, and thin out the plants to one foot apart.
Improved Dwarf Green. Very early; smooth pods, . . . . $05 \quad .10$.75
White Velvet. Pods smooth, of large size, and a creamy white, . 05 . 10 . 75

ONION. (Zwiebel.)
One ounce will sow 100 feet of drill. Four or five pounds to the acre.
The onion thrives best in a light, loamy, mellow, soil; and unlike most kinds of garden vegetables, succeeds well when cultivated on the same land for successive years. The seed should be sown as early in the Spring as the ground is in good working condition, in drills fourteen inches apart, and covered one-half inch deep. When the plants are three inches high, thin to two inches apart. Keep free from weeds, but be careful not to disturb the growing bulbs. A top dressing of wood ashes, applied after the second weeding, is very beneficial to this crop, as will soon be observed by the dark and healthy change of color given to the plants. The onions will ripen early in September, and after being gathered and exposed to the sun a few days for drying they will be ready for storing or the market.

Yellow Globe Danvers. Our strain of this superior variety is un-
surpassed; selected with the greatest care; the true shape and color; a reliable and sure cropper, and the most salable
onion in this market. Extra Fine Stock, Eastern Grown, and color; a reliable and sure cropper, and the most salable
onion in this market. Extra Fine Stock, Eastern Grown,

Pkt. Oz. Lb.

$.25 \quad 1.25$
Potato Onions. These are considered a little earlier than the white and yellow sets1.00

## PARSLEY. (Petersilie.)

One ounce will sow 150 feet of drill.
Parsley succeeds best in rich, mellow soil, and as the seed vegetates slowlysometimes remaining in the earth four or five weeks before the plants appear-the sowing should be made as early in spring as the ground is in working condition. When the plants are two or three inches high thin them out to eight or ten inches apart, being careful in the thinning to leave only the best curled plants. The leaves of the curled varieties afford one of the most beautiful of garnishes; they are also used for flavoring soups and stews.

## PARSNIP. (Pastinake.)

One ounce will sow 100 feet of drill. Five to six pounds to the acre.
Sow in April or early in May, as parsnips require a long season to mature. Their cultivation is otherwise the same as directed for carrots. They may be dug in the autumn and stored for winter use, but if left in the ground till the following spring they are very much improved in flavor. Sow a liberal quantity of seed, as from its nature it does not always come up well.

PEAS. (Erbse.)
One quart will sow 100 feet of drill; one and one-half bushels per acre.
The Pea comes earliest to maturity in light, rich soil. Sow as early as the weather will permit, in drills two to three and one-half feet apart, and cover three inches deep. Forgeneral crops a good dressing should be applied, and for the dwarfgrowing kinds the soil can hardly be made too rich. For a continuous supply during the season, sowings should be made from early in April until the middle of June; planting should then be discontinued until the middle of July, when a good crop may sometimes be secured by sowing an extra early sort. The crop should be gathered as it becomes fit for use.

All wrinkled Peas are superior to, more delicate in flavor, and remain longer in season than the smooth sorts, but should not be sown until the ground becomes warm, for, as in sugar corn, the wrinkled appearance indicates the greater amount of saccharine matter. We contract annually with growers of reliability and experience, who raise our supplies from the finest and most carefully selected seed stocks in the country. We cordially invite growers for market and all others to call and examine ours when in need of true, pure and fresh seed Peas.

## EXTRA EARLY VARIETIES.

Grey's Perfection. One of the earliest peas in cultivation; the pods, which are numerous, contain six or seven good sized peas. Very productive and of fine flavor. $2 \frac{1}{2}$ feet,

Canada Peas. These varieties are used for field culture only. In their dry state they are used extensively for culinary purposes and for feeding stock. Qt. 15 cts . Peck 50 cts . Bus. 2.00.

PEPPER. (Pfeffer.)
One ounce will produce about 1500 plants.
Sow in March or April in a hot-bed, and transplant into open ground late in May, or early in June, when the weather has become well settled, as the plants are quite tender. Set in rows about two feet apart, and fifteen inches apart in the row. A warm, sandy loam is best suited to their growth.

Pkt. Oz.

> Cherry Red. A small, round variety; intensely piquant; a rich, glossy red when ripe,.

Golden Dawn. A large yellow variety, resembling the Bell in shape. Mild and sweet,
Large Bell, or Bull Nose. Good for Mangoes; early, sweet, and less pungent than many; one of the best,
Long Red Cayenne. A long, slim pod, rather pointed, and when ripe of a bright red color; extremely strong and pungent,25

Procopp's Giant. Very long and large; fine scarlet; flesh thick, . . 05.25
Ruby King. Long, about five inches; very thick; fine, mild flavor, . .05 . 25
Squash. Flesh thick, mild, and pleasant to the taste, though more piquant than some,
Sweet Mountain. Grows to large size; shape somewhat like the Bell, but much larger; much used for pickling,

## POTATOES. (Kartoffel.)

Eight to ten bushels will plant one acre.
A good, sandy loam produces the best potatoes, but tney can be grown on all kinds of soil. New or pasture land, with the turf freshly turned, produces the finest crop. Make furrows of good depth, three feet apart. Scatter a liberal dressing of phosphate or decayed stable manure along the drill, and set the seed about ton inches apart in the rows. Cover with about two inches of soil, and begin to cultivate when the plants are well up. At each successive hoeing, bring additional soil about the
 plants.

The necessity of changing Potato Seed is universally admitted by all well posted growers. By using our Northern Grown Seed you are assured of early maturity, increased yield and a vigorous growth.
Beauty of Hebron. A very productive variety of fine quality; good either as an early or general crop potato.
Clark's No 1. Similar to Early Rose but more productive, slightly larger and more mealy. A firat class potato in every respect.
Early Ohio. One of the earliest; tubers almost round and very solid; good either for table or market purposes.
Early Rose. The well known variety; early and prolific. Our stock is of the desirable "Houlton Rose" seed.
New Queen. Flesh white and quality unsurpassed; Early and productive. In shape and color it resembles the Beauty of Hebron.
Pearl of Savoy. Flesh white and mealy; a large yielder, and vigorous grower; a desirable early variety.

LOWEST MARKET PRICES. Write for Quotations.

## POTATOES_Continued.

American Wonder. Skin pure white; very fine grain and excellent quality; heavy yielder.
Carman No 3. The handsomest large White Potato; heavy yielder of excellent quality.
Bliss' Triumph, a well known early sort, of superior quality and excellent flavor.
LOWEST MARKET PRICES. Write for Quotations.

## PUГTPKIN. (Curbis.) <br> One ounce will plant 20 hills. One pound 250 hills.

Sow in good soil in May, when the ground has become warm, in hills eight or ten feet apart each way; or in fields of corn, about every fourth hill. The pumpkin is not so particular in regard to soil as the melon or cucumber, but in other respects is cultivated in a similar manner, though on a larger scale. If planted in hills by themselves, thin out the plants when beginning to run, to three in each hill.

Connecticut Field. A large yellow variety, productive and largely grown for feeding stock, . . . . . . . . . 05 . 10 . 50
Large Cheese. Hardy, remarkably prolific, sweet and wellflavored,75

Mammoth. A productive variety, which grows to an immense size, often weighing more than a hundred pounds, .
Nantucket, or Negro. An exceedingly prolific variety of dark green color. It has a hard shell, and is one of the sweetest pumpkins in civilization, $.05 \quad .10$
Sugar. A small fine-grained, sweet pumpkin; very prolific, and a fine table variety, 60

RADISH. (Rettig.)
One ounce will sow 100 feet of drill.

For early use sow in the hot-bed in February or March and in the open ground as soon as it can be worked. Sow in rich, mellow soil, in drills about fourteen inches apart, and thin out the plants to three inches apart in the drills. For a continuous supply during the season, make sowings every two weeks, as the early sown plants become rank and unfit for use as they increase in size. Radishes to be crisp and tender, must be grown quickly and be frequently watered if the weather is dry.

Scarlet Globe. Of distinct shape, brilliant color, crisp and white; excellent for forcing,

| Pkt. | Oz. | Lb. |

| d Black Spanish. Skin black; roots globe shaped; white fleshed and piquant flavor . | .0\% | 10 | 1.00 |

## RHUBARB. (Rhabarber.)

One ounce will produce about 750 plants.
Rhubarb succeeds best in deep, rich loam; the richer its condition, and the deeper it is stirred, the better, as it is scarcely possible to cultivate too deeply or to manure too highly. It is propagated by seeds, or by division of the roots-the latter being the usual method. Sow the seed in drills eighteen inches apart, and thin out the plants to nine inches apart in the drills. When the plants are one year old transplant into beds, setting the plants five feet apart each way. Do not cut until the second year and give a liberal dressing of manure every Fall.

|  | $.05$ | Oz. | Lb. |

## SALSIFY or OYSTER PLANT. (Haferwurzel.)

One ounce will sow 50 feet of drill, about seven pounds an acre.

A very delicate and nutritious esculent, especially esteemed for its peculiar oyster flavor. Sow the seed early in spring, in drills twelve inches apart and one inch deep, thinning out the young plant to six inches. The roots will be ready for use in October, when a supply should be taken up and stored like carrots. Those remaining will suffer no injury by being left in the ground till spring.
Mammoth Sandwich Island. Tender and delicious, very superior. Pkt. 5 cts. Oz. 15 cts. Lb. 1.50.
Long White French. Pkt. 5 cts. Oz. 15 cts. Lb. 1.25.

## SPINACH. (Spinat.)

One ounce will sow 50 feet of drill. Twelve pounds will sow an acre.

Spinach may be grown on any ordinary soil. It is grown both as a spring and summer crop. For early use, sow in August or September, in drills twelve to fourteen inches apart. At the approach of cold weather cover lightly with straw, or any handy litter. Uncover when the plants begin to make a new growth in spring. For summer use, sow early in spring, in same way as above, using rather less seed. If the plants stand too thick, thin to three or four inches apart. A liberal dressing of good manure should be used. The land can hardly be made to rich.

Round Thick-Leaved. Leaves large, thick and fleshy; the variety generally grown for market, and equally good for Spring or Fall sowing, .15

Victoria. Large, thick dark green leaves; excellent for Spring sowing, heavy cropper; long standing and excellent quality, .
Savoy=Leaved. A valuable variety with wrinkled leaves, resembling the Savoy cabbage; it is very hardy and prolific, . .
Prickly. An exceedingly hardy and productive variety, adapted for Fall sowing,
$.05 \quad .10$
.15 Zealand. Entirely distinct with very large seeds; makes a low spreading plant from which delicious, tender greens can be gathered the entire summer. May be started in a hot-bed and transplanted or sown out-of-doors when the ground is warm, allowing two feet between the plants, .

## SQUASH. (Speise Kurbiss.)

One ounce of the small seeded variety will plant 40 hills; of large seeded, 15 hills.
The squash is one of the most nutritious and valuable of all our garden vegetables. The Summer varieties come to the table early in the season, and are very palatable, while the Winter sorts can be had in perfection from August until the Summer varieties are again in condition. The young plants are very tender and sensitive to cold, and planting should be delayed until the ground is dry and warm. Plant in well-manured hills, in the

SUMMER CROOKNECK. same manner as cucumbers and melons, the bush varieties three or four feet apart each way, and the running kinds from six to eight feet apart. Sow eight or ten seeds to a hill, thinning out, after they have attained their rough leaves, and danger from bugs is past, leaving two or three of the strongest plants in each hill.

Hubbard. Standard winter squash; grown more extensively than any other late variety; color dark green, shell extremely hard; flesh dry, fine-grained and sweet; excellent keeper. Pkt. 5 cts. Oz. 15 cts. Lb. $\$ 1.25$
Warted Hubbard. A superior strain of mammoth size and entirely covered with warty excrescences. Rich dark green color and of very best quality. Pkt. 5 cts. Oz. 15 cts . Lb. $\$ 1.25$.
Marblehead. Resembles the Hubbard, but is earlier; has a gray, hard shell; a very popular winter sort. Pkt. 5 cts. Oz. 15 cts. Lb. \$1.25.

HUBBARD SQUASH.
Pike's Peak. Of superior flavor, flesh thick, solid, orange color, very dry . . . . . . . . . . . . 05 . 10
Winter Crookneck. Excellent for winter, flesh close-grained, sweet, and of fine flavor

## SUNFLOWER.

## One quart will plant 300 feet of drill.

The sunflower, during the past few years, has attracted considerable attention as a profitable field crop; its seeds are used as food for poultry, and in the manufacture of oil. It is also planted with satisfactory results on low, swampy grounds, to absorb miasma.
Mammoth Russian. Producing extra large flowers with an abundance of seed. Pkt. 5 cts. Qt. 15 cts . Bush. 2.50.

## TOBACCO.

Connecticut Seed-Leaf. Best adapted to the climate of the Northern and Middle States. Pkt. 10 cts. Oz. 30 cts.
Havana. Imported Seed. Pkt. 10 cts. Oz. 30 cts.

CRIMSON CUSHION.

This delicious vegetable is one of the most important of all garden products. The seed should be sown in a hot-bed about the first week in March, in drills five inches apart, and half an inch deep. When the plants are about two inches high, they should be set out four or five inches apart in another hot-bed, or removed into small pots, allowing a single plant to a pot. About the middle of May the plants may be set out in the open ground; they are planted for early crops on light, sandy soil, at a distance of three feet apart, in hills in which a good shovelful of rotted manure should be mixed. On heavy soil, which is not suited for an early crop, they should be planted four feet apart. Water freely at the time of transplanting, and shelter from the sun for a few days until the plants are established. Sufficient plants for a small garden may be started by sowing a few seeds in a shallow box or flower pot, and placing it in a sunny window of the room or kitchen.
Acme. Rich glossy crimson, tinged with purple; perfectly smooth; one of the earliest,
Pkt. Oz. $\quad 1 / 4 \mathrm{Lb}$.

## TURNIP. (Rube.)

One ounce will sow 150 feet of drill. One and one-half pounds per acre.
Turnips do best in highly enriched, light, sandy or gravelly soil; sow the earliest varieties as soon as the ground can be worked in the spring, in drills twelve to eighteen inches apart. For a continuous supply through the season sowings should be made every two weeks until the last of July; from which time until the middle of August the principal sowings are made for Fall and Winter use. Swedish or ruta-baga turnips are largely grown for a farm crop, as well as for the table; make sowings from the tenth of June until the last of July, in drills two to three feet apart, and the plants when well up should be thinned to ten inches apart. They are best preserved in a pit or cellar during the Winter, and are excellent for the table early in Spring.
Extra Early Purple Top Munich. -Very early ; of a handsome ap-pearance, somewhat flattened, white, with purplish top; fleshsnow-white, fine grained, and most delicate . . . . . 05 . 10Pikt. Oz. Lb.10 60

Sweet German. A superior variety for table or stock; flesh firm,sweet and juicy

## POT, SWEET, AND MEDICINAL HERBS.

No garden is complete without a few herbs for culinary or medicinal purposes; they are easily grown, and when preserved by drying, are ready for use at any season of the year. Plant in Spring, when the ground is warm, in drills, covering lightly. When the plants are well up, thin out or transplant to about four inches apart. They should be harvested on a dry day just before the blossom developes, dried quickly and bottled, or closely packed in dry boxes with the air entirely excluded.

# Vegetable Roots and Plants. 

 ASPARAGUS.

## DWARF ESSEX RAPE.

This is very valuable for sheep pasture. It can be sown in May, and will beready for pasturing in July or August; or it may be sown in June, or even up to the latter part of July, and yet furnish, under reasonably favorable circumstances, a large amount of pasture and fodder. It is very suitable for sowing on land that an early crop of potatoes has been taken off. In drills, about six pounds to the acre; broadcast, ten pounds to the acre. Lb., 15c.; $100 \mathrm{lbs} ., \$ 8.00$.

## BOSTON LAWN GRASS.

Boston Lawn Grass is composed of the very best varieties of grass, such as long experience has shown to be the best adapted to produce a thick, heavy, carpet-like lawn. In this mixture we use only the very best recleaned seed, and can guarantee that for purity and germination it is equal to any variety sold under any name.

Our customers can rely in buying Boston Lawn Grass Seed on its being the very purest seed obtainable, and entirely free from weeds or foreign seeds. Qt ., 20 cts .; 4 qts., 60 cts.; peck, $\$ 1.00$; bushel, $\$ 4.00$.

## GREY'S SPECIAL RECLEANED LAWN GRASS.

The grasses used in this mixture are the purest that can possibly be procured and are entirely free from weeds or chaff. We have supplied this to the leading Golf Clubs and Parks, and it has always given satisfaction. There is nothing better. Sow 60 lbs . to the acre. Sold by weight, a measured bushel weighs 32 lbs. Per lb. 30 cts.; 5 lbs., $\$ 1.40 ; 10 \mathrm{lbs} ., \$ 2.75 ; 100 \mathrm{lbs} ., \$ 25.00$.

## PERFECT LAWN FOOD.

10 lb . bag, sufficient for $1,000 \mathrm{sq} . \mathrm{ft}$., $\$ .50 \left\lvert\, \begin{gathered}50 \mathrm{lb} \text {. bag, sufficient for } 5,000 \mathrm{sq} \text {. ft., } \$ 1.60\end{gathered}\right.$ $25 \mathrm{lb} ., \quad, \quad, 2,500 \mathrm{sq} . \mathrm{ft} ., 1.00$

## GRASS SEEDS.

## Prices subject to market fluctuations.

We make a specialty of Grass Seeds, and send out only the most useful varieties which are adapted to this country. All that we offer have been recleaned and will meet the views of the most critical buyers. Our prices are as low as the quality of seed we offer can be sold at, and should not be compared with the low prices quoted for inferior grades. We shall always be pleased to mail samples for comparison.
Timothy. (Phleum pratense.) One of the most important of the grasses, Lb. 100 Lbs . thriving best upon rich, heavy soils, where it remains permanent and produces heavy crops. Sow 25 lbs . to the acre when sown alone
6.00

Red Top. (Agrostis vulgaris.) A valuable native permanent grass, growing in almost any soil, moist or dry, and standing our hot climate. Sow 42 lbs. per acre, if alone
Choice Jersey Red Top. . . . . . . . . . . . 1210.00

Red Top Fancy. Clean Seed. Absolutely clean and free from chaff . . 2520.00

## GRASS SEEDS.-Continued.

Rhode Island Bent. (Agrostis canina.) A fine, hardy, very compact grass; very permanent, readily forming a heavy sward; excellent for pastures. Sow 4 bushels per acre, if alone.(10 lbs. per bushel)

Kentucky Blue. (Poa pratensis.) Also called "June grass;" an early grass of much value; will do well upon any ordinary soil; stands the heat of summer remarkably well. For pastures and lawns it has no superior, giving that peculiar, rich shade of bluish-green so much admired in the best lawns; also making a very close, velvety turf. It is usually sown mixed with other fine grasses; when used alone, 30 to 40 lbs. per acre. Blossoms in June. Fancy clean seed.

Fowl Meadow. (Poa serotina.) A valuable grass for wet meadows, where it will produce large crops of excellent hay after it has become well established. It thrives on such lands as are occasionally overflowed, but will not endure to remain under water for a long period, especially in hot weather. Blossoms in July or August. Sow 20 lbs. per acre .
Sweet Vernal, True Perennial. (Anthoxanthum odoratum.) Useful to mix with other grasses for lawns, in which it is invaluable on account of its early growth and the fragrant odor which it imparts to the other grasses when drying; very hardy and permanent
Crested Dogstail. (Cynosurus cristatus) Good for permanent pasture for sheep, is productive and early, suffers but little from dry weather, and is one of the best grasses for lawns; thirty-five pounds to the acre

MEADOW FESCUE.

Hard Fescue. (Festuca duriuscula.) Admirable pasture grass of fine quality; thrives well in dry situations; thirty pounds to the acre

Meadow Fescue. (Eestuca pratensis.) This is excellent for hay when sown with other grasses, such as Orchard Grass and Timothy, and is also considered one of the best grasses for permanent pasture on a great variety of soils; sow forty pounds per acre

Italian Rye Grass. (Lolium Italicum.) Thrives in any soil, yields an early and abundant crop, valuable for mixing with other pasture grasses; sow fifty pounds per acre

Perennial Rye Grass. (Lolium Perenne.) A nutritious permanent grass for meadows and pastures, or for mixing with other grasses for lawns; does well on all soils; sow fifty pounds per acre if alone
Meadow Foxtail. (Alopecurus pratensis.) One of the best and earliest of pasture grasses; thrives best in moist localities; thirty pounds to the acre
.30
Rough=Stalked Meadow Girass. (Poa trivialis.) Produces an abundant crop of highly nutritious herbage, valuable for either moist or dry soils; thirty pounds to the acre.
25.00

Sheep's Fescue. (Festuca ovina.) Is excellent for pasturage for sheep; is short and dense in its growth, making it valuable also for grass plots. Thirty pounds will sow an acre

Tall Fescue. (Festuca elatior.) Excellent for permanent pastures on moist soils, on which it yields immensely. Sow forty pounds per acre

## GRASS SEEDS-Continued.

ORCHARD GRASS.

Orchard. (Dactylis glomerata.) One of the earliest grasses; yields immense crops and is excellent for pasture or hay; should be cut as it is coming into bloom, and will produce a heavy second crop; one of the best grasses. Sow forty pounds per acre. Lb., 20c. $100 \mathrm{lbs} ., \$ 15.00$.

Tall Meadow Oat Grass. (Avena elatior.) This grass produces an abundant supply of foliage, and is valuable for pasture on account of its early and luxuriant growth. It shoots up very quickly after being cut, and produces a thick growth of aftermath, which also makes it valuable as a soiling crop. Forty-five pounds sow an acre. Lb., 25̌c.; 100 lbs., $\$ 20.00$.

## CLOVER SEEDS.

There are no plants so valuable for fertilizers as the clovers. They have the faculty of absorbing nitrogen from the air, and also of rendering available much of the inert plant food of the soil. Their long, powerful tap roots penetrate to a great depth, loosen the soil, admit air, and by their decay, add immensely to the fertility of the soil. The seed may be sown in Fall or Spring; the best results will come from sowing in the Spring, and it is often sown on the late snows of April.

Lb. 100 Lbs.

Red Clover, Medium. (Trifolium Pratense.) The leading variety of
clover for pastures or meadows. Sow in Spring or fall . . . . 20

15.00

Red Northern, or Mammoth. Grows four to five feet high, and is used by some to plow under for manure
16.00

Alfalfa, or Lucerne Clover. (Medicago sativa). Early, productive and lasting a number of years. Succeeds in good, deep soil .
Alsike, or Swedish. (Trifolium Hybridum.) Hardiest of all the clovers and on rich moist soil yields an enormous quantity of hay or pasturage. Valuable for sowing with clovers or grasses, as it forms a thick bottom and increases yield of hay
Crimson Clover. (Trifolium incarnatum.) An annual variety, largely used in the south for feeding green and for hay. The yield in fodder is immense, and after cutting it at once commences growing again and continues until cut by frost. Sow in April or May; ten to fifteen pounds to the acre
White Dutch Clover. (Trifolium Repens.) The best variety for lawns, as it forms a close herbage and remains green throughout the season; it is also valuable when mixed with grass seeds for pasture. . 30

## MILLETS.

Millets should be sown in June and July, and are Annual forage plants of thick growth, valuable for green fodder or hay, maturing in fifty to seventy-five days from the time the seed germinates, producing an abundant yield of forage, relished by all kinds of stock. They must be cut while in blossom to make good hay.

German, or Golden. (Southern grown.) A valuable annual hay and fodder crop, more productive and coarser than the Hungarian grass; medium, early, four to five feet high. Sow one bushel to the acre. Bushel, $\$ 2.00$.

Common Millet. (Panicum Miliaceum.) Very early, two to three feet high, foliage broad, heads open, branching panicles. Bushel, $\$ 1.75$.

Japanese. (Panicum crus Galli.) Grows taller and stools out more freely than the Common Millet; very productive. If sown early and cut, usually produces a good second crop. It has produced in Massachusetts, six tons dry hay per acre; highly recommended. Sow twelve quarts per acre. Bushel, $\$ 5.00$.

Hungarian Millet. (Panicum Germanicum.) An annual forage plant, early and productive, growing two to three feet high with an abundance of foliage, often yielding two to three tons per acre. Sow one bushel to the acre. Bushel, $\$ 2.00$.

## CHOICE FLOWER SEEDS.

In the following pages we describe, arranged alphabetically, the leading Flower Seeds, including many New and Special flowers of unusual beauty. These Seeds are all of the finesi strains of the best varieties and are sure to give entire satisfaction. They are grown by flower seed specialists in America, England, Germany and France.

Inducements to Cash Buyers. On all orders for seeds in packets, accompanied by the money, purchasers may select twenty-five cents' worth extra for each dollar sent. Thus, any one sending us one dollar may select seeds in packets amounting to one dollar and twenty=five cents. For two dollars seeds in packets amounting to two dollars and fifty cents, and so on.

This offer does not include seeds by weight or measure, Bulbs or plants.
We mail free all Flower Seeds at packet and ounce prices. No.

When ordering write the numbers only, not the names.

1. ABOBRA Viridiflora. A pretty climber for the summer garden; foliage dark and glossy ; numerous small scarlet fruit; half-hardy perennial. Ten feet
ABRONIA. Beautiful annual of trailing habit, with Verbenalike clusters of sweet-scented flowers; height, eight inches
2. Arenaria. Lemon-yellow: wax-like
3. Umbellata Grandiflora. Delicate rose

74. Odorata (W'oodruff). White, sweet-scented

## ASTERS.

It is unnecessary to dwell on the great beauty of these popular favorites, as they are appreciated by everyone. Uur seed is the very finest it is possible to procure. We recommend our friends to plant a number of varieties, as no other annuals afford so magnificent a display during the late summer and fall months. For best results, Asters should have a good, rich soil and plenty of moisture. As the roots are produced near the surface, a mulching during hot weather is very beneficial. The location of the bed should be changed every year.
75. Betteridge's Improved Quilled. Perfectly double, large showy flowers ; finest mixed. $1 \frac{1}{2} \mathrm{ft}$.

## SWEET PEAS.

It is unnecessary to say much about theae lovely fragrant flowers, their universal favoritism being well established. The seed should be sown as early as the ground can bs worked in the spring, to enable the vines to get a good strong growth before the warm weather comes. Prepare the ground by thoroughly working in a large quantity of well-rotted manure. Make a trench 6 inches deep; in this sow the seed and cover 2 inches deep. Fill in the trench as the plants advance. This will secure a deep planting without the bad effect of deep covering of the seed at first, and enable plant to bloom through the heat of summer. As the flowers come into full bloom or fade they should be cut off, for if the pods are allowed to form the plants will stop blooming.

Our Sweet Peas are unsurpassed, h aving been selected from the finest strains. They include all the improved large-flowering varieties of recent introduction.

## Novelties of merit not included in our general list. BEANS.

Giant Stringless, Green Pod. Color deep green, very long, round, fleshy pods; very prolific and entirely stringless. Pkt., 10c.; Qt., 40c.
Stringless Refugee Wax. Pods round, extra long, quality very fine, perfectly stringless. Pkt., 10c.; Qt., 40c.
Extra Early Refugee. Pods green, round, quality excellent, extremely early and prolific. Pkt,10c.; Qt., 35̌c.

## CABBAGE.

Early Spring. The earliest flat-headed cabbage in cultivation; as early as Wakefield. The heads are uniform and very solid. Pkt., 10c.; Oz., 30c.

## CARROT.

Early Chanteney. The best sort for bunching, stump rooted, and a good color at all stages of growth. Pkt., 5c. ; Oz., 10c.; Lb., $\$ 1.00$.

## SWEET CORN.

Washington Market. Medium late variety. One of the best for general crop for market or private use. Ears of large size with 16 to 18 irregular rows. Kernels deep and tender. Pt., 15c.; Qt., 25c.; Pk., \$1.50.

## MUSK MELON.

Rocky Ford. This has become one of the most popular melons. The fruit is oval; slightly ribbed, and covered with heavy netting. Flesh thick and green, very sweet and luscious. Pkt., 5c.; Oz., 15c.; $1 / 4$ Lb., 50 c .
Long Island Beauty. The earliest and finest of the Hackensack type of melons. Fruit very juicy and sweet. Pkt., 5c.; Oz., 25ॅc. ; $1 / 4 \mathrm{Lb}$., 75c.

## WATER MELON.

Coles Early. Very early variety, rind thin, flesh very deep and sweet, color light green striped. Pkt., 5c.; Oz., 10c, ; $1 / 4 \mathrm{Lb} ., 25 \mathrm{c}$.
Sweet Heart. Vine vigorous and productive, ripening its fruit early. Fruit large, oval, uniformly mottled light green. Thin rind, but firm. Flesh bright red, firm and solid, very sweet and melting. Pkt., 5c.; Oz., 10c.; $1 / 4 \mathrm{Lb} ., 25 \mathrm{c}$.

## PEAS.

Days Early Sunrise. A large white pea of strong and robust growth; height two feet, heavy yielder, ready for the table about a week after the first early peas. Pt., 20c.; Qt., 35c. ; Pk., \$2.00.
Gradus. The most attractive novelty of recent years. Large, handsome pods, resembling Telephone in size and shape, well filled with large peas, ripening with the earliest. Habit vigorous, very quick to germinate and push to maturity. Foliage large pale green in color, pods long, straight, and slightly rounded at the point. Seed large, wrinkled, cream-colored. Height, three feet. One of the earliest of all wrinkled peas. Pt., 25c.; Qt., 50c.
Dwarf Telephone or Daisy. Season medium. Pods long, remarkably well filled, color pale green, peas large, tender, and of delicious flavor. Pt., 20c.; Qt., 35c.; Pk., \$2.25.

## TOMATO.

Best of All. One of the earliest tomatoes in cultivation. Fruit of medium size and of brilliant red color. Slightly corrugated when grown in the field; when grown under glass it is perfectly smooth. Very prolific and a fine, delicate flavor. Pkt., 15c.; Oz., 40c.
Freedom. Fruit is borne in clusters, perfectly round, dazzling scarlet. The flesh is very solid, having but few seeds. The most prolific of all early tomatoes and equal in size and quality to any early sort on the market. Pkt., 15c.; Oz., 50c.

## FLOWER SEED NOVELTIES.

## ASPARAGUS.

Plumosus Nanus. This graceful climbing asparagus has taken the place of smilax in nearly all fine decorations, as it is much more graceful, its foliage being tiner than that of the most delicate fern. It makes a fine house plant, and the foliage will last cut from two to three weeks. Pkt., 20c.
Sprengeri. One of the best basket plants for house, greenhouse, or outdoor culture in summer. The fronds are now considered indispensable in all fine decorations. Grows readily from seed. Pkt., 25c.

## MIGNONETTE.

Evans' Boston Giant. The finest strain of mignonette in the Boston market. Originator's seed. Pkt., 20c.; Oz., $\$ 1.50$.

## PETUNIA.

Howard's New Star. A free growing and very profuse blooming strain, the result of many years' selection and cross-fertilization. The ground color is a rich, velvety, dark crimson maroon, on which is a beautiful five-pointed star varying from blush to pure white in color and extending from the center to the margin of the flower, where it deepens in color and blends beautifully with the dark ground.
Per Pkt., 25c.

## SHASTA DAISY.

Introduced by Mr. Luther Burbank, the noted horticulturist of California. The flowers are extremely large and graceful, with three or more rows of petals of the purest glistening whiteness on single, strong, wiry stems nearly two feet in length. Pkt., 25c.

## STOCKS, MAMMOTH CRIMSON COLUMN.

This is identical with the well-known Mammoth White Column in growth and habit, but is of a rich bright crimson color. The flower spikes are large and well covered with enormous double flowers, and its brilliant color makes it a valuable variety for the florist and the private gardener. Pkt., 20c.; 1/8 Oz., $\$ 1.00 ; \mathrm{Oz} ., \$ 7.50$.

## SWEET PEAS.

BLACK KNIGHT. Flowers of large size and fine, bold form ; standard a rich wine brown or dark claret; wings heavily shaded with brownish purple. The effect is very dark and rich in coloring, turning almost black when fully opened.
COUNTESS CADOGAN. Very large flowers, which when first opening resemble those of Captain of the Blues; but as they open further change to a inght bluish purple in standard and clea. blue in sings. The color effect is that of a bright blue, fading to a lighter blue as the flowers remain open; very effective in shade and attractive in form. The tlowers are of the largest size and borne three on a stem.
EMILY LYNCH. A fine large flower, beautifully shaded and of excellent substance; the full rounded $\mathrm{s}^{+}$andard is slightly booded and of a deep rosy pink shade wings flat and widely spread, suffused with soft rosy pink.
GOLDEN GLEATI. Fine large flowers, with broad and well-rounded standard of silky texture; color, creamy yellow.
LADY GRISEL HAMILTON. Most attractive light lavender shading; flowers of fine hooded form and extra large size. Standard light lavender with azure blue wings; very light and dainty in effect.
LADY MARY CURRIE. A deep orange pink, delicately shaded rosy lilac.
MONT BLANC. The earliest pure white, flowers large, stems long. Highly recommended.

NAVY BLUE (Burpee's). The richest and most distinct shade in dark-colored Sweet Peas. The large flowers are of a rich, glowing violet purple, having the effect of a dark navy blue, although, on a close examination, the standards have a faint tinge of claret or wine red.

PINK FRIAR. One of our finest introductions, and a fitting companion to the beautiful Gray Friar. The coloring is a soft carmine rose, delicately suffused on a silvery or crystalline white ground.
SALOPIAN. Deep crimson, tinged with mulberry red, suffused with rich orange scarlet.
SADIE BURPEE. Flowers are of the very largest size and purest snowy white. The difference from Blanche Burpee is chiefly shown in the taller standard, which is also more pronounced in its hooded character. The large flowers come in threes $a_{\nu}$ the summit of a stiff stem, and are of firm substance, lasting well when cut. It is the finest as well as the largest pure white for cut flowers and exhibition purposes.
STELLA MORSE. A most distinct shade, the flowers being heavily tinted with rich apricot as in Safrano and Sunset Roses. The color effect is deeper and richer than in any other of the creamy yellow varieties; has a faint tinge of pink underlying tne creamy shading, producing a true apricot shade. One of the most desirable varieties of cut flowers.

Each, per Pkt., 10c.; per Oz., 20c.

## BULBS, ROOTS AND TUBERS.

 FOR SUMMER AND AUTUMN=FLOWERING.Of the easiest possible culture, and rapidly increasing in popularity; sure to grow and produce abundance of bloom in a great variety of forms and richest colors. The bulbs may be lifted in the autumn as soon as ripe and kept for the next season's planting.

## ACHIMENES.

Remarkably showy, free-blooming plants of easy cultivation. Pot the small bulbs early, in a mixture of loam and leaf mould. Keep rather warm, and water with care. After flowering, dry off in the same pots, and keep the bulbs dry and warm during winter.
Mixed Varieties. Very fine colors . . . . . . Each 8c., Doz. 75c.

## AMARYLLIS.

Beautiful Lily-like plants, remaining a long while in flower. Admirably suited for culture in pots and tubs. They thrive best in a soil composed of loam, leaf-mould and sand.
Belladonna Major. Silvery rose-pink, very fragrant . ${ }^{\text {Each. }} 25$
Crispa, or Strumaria. Deep pink, fine . . . . 30
Equestre. Soft Salmon-scarlet; large flowers, the broad petals marked in centre with a prominent white strips
Formosissima. (Jacobean Lily.) Handsomelyformed flowers of velvety crimson color. If planted out of doors will bloom freely quite early. . . . Each, 15 c ; doz. 1.75 Johnsoni. Very large crimson and white flowers
amarillis. scarlet, flower in a cluster, blooming in summer and autumn; this is the variety so much seen growing in tubs on lawns, etc.
Vittata. White, deep red stripes on each petal

## BEGONIA, TUBEROUS=ROOTED.

For bedding and as pot-plants, these beautiful flowers are very desirable and popular. They bloom continuously all summer flowers very large, and outrivaling those of the most brilliant Geraniums. They can be grown successfully by any amateur. In habit this fine strain is dwarf, with strong, erect flower-stems, carrying the blossoms above the foliage. The flowers are circular, large and of great substance; the colors are most beautiful, rich and varied. At the low prices we quote, this superb flower is brought within the means of all for liberal planting.

Lemoine's Hybrids, Superfine Mixed. A beautiful and remarkable class of Gladiolus, which for vivid and rich orchid-like coloring have no equal; in the blotch, which is a remarkable and typical feature, the coloring is exceptionally fine,
New Giant Gladioli. They are of great substance and of gigantic size, frequently seven to nine inches across. The form of both the flower and spike is perfection itself. Orchids cannot surpass them in their varied and delicate shades, markings and blendings. Every color known among Gladioli is represented and many never before seen, many having beautifully mottled and spotted throats, made up of white, crimson, pink, yellow, etc.. and witn a peculiar network of charming spots and colors. Finest mixed, 10c. each;

GLOXINIA, LARGE FLOWERING

## GLOXINIA.

Magnificent for house culture, producing in great profusion beautiful flowers of the richest and most beautiful colors. They succeed best in sandy loam and peat, and require a moist heat. After blooming dry off gradually, let the bulb remain in the pot without water, and keep in a warm place until they show signs of starting again.

Large Flowering Varieties. Separate colors. 20 cts . each; $\$ 2.00 \mathrm{doz}$.

Large Flowering Varieties. Finest mixed, in many beautiful colors. 15 cts. each; $\$ 1.75 \mathrm{doz}$.

Heuchera Sanguinea. One of the handsomest hardy perennials of recent introduction. The flowers are of a rich crimson color, the leaves light-green. The graceful flowers on long spikes form splendid material for bouquets. 20 cts. each; $\$ 2.00 \mathrm{doz}$.

## HYACINTHUS CANDICANS.

A snow-white summer flowering Hyacinth, growing 3 to 5 . feet in height, gracefully surmounted with from 20 to 30 pure white bell-shaped flowers. 10 cts. each; 75 cts. doz.

## LILIES.

No class of plants can lay so much claim to our attention as the Lilies. They are stately, elegant and beautiful, and possess the most agreeable perfume, and for general effect, whether growing in garden or house, they have no rivals. The soil should be rich, deep and mellow, with good drainage, as nothing will injure the bulbs more than water collecting and standing around them. Do not put manure about the bulbs when setting, as it collects moisture and insects, and often causes the bulbs to decay. Top dressing is the better way to enrich the soil after the bulbs are set. The beds should be well covered with leaves and strawy manure to exclude the frost. Set bulbs 4 to 6 inches deep according to their size.

## Auratum. (Golden Banded Lily of Japan.)

 Immense white flowers, each petal marked with wide gold band and spotted with maroon,Batemanni. Upright flower, deev apricot tint, self color, 4 ft .
Chalcedonicum. Intense scarlet; Deautiful, 3 ft .

Excelsum. Delicate buff, fine scented; beautiful, 3 ft .
Speciosum (Lancifolium) Album. (Japan Lily.) Pure white, fragrant; very hardy,
" Roseum. White, spotted rose, splendid bulbs,
" Rubrum. White, spotted crimson, splendid
Superbum. Yellowish-red flowers, from twenty to fifty in number in the form of a pyramid, . 15
Tigrinum Splendens, (Tiger Lily.) Rich scarlet with black spots,
Tigrinum Flore Pleno. Double, very fine, . 15
1.50

## LILIUM AURATUM.

Wallachianum Superbum. The most beautiful of all the Trumpet Lilies. The flowers are purest white, shaded with yellow at the base, trumpet-shaped and about ten inches long. It is massive, waxlike, and keeps long when cut. A magnificent introduction.

## MIADEIRA or MIGNONETTE VINE

A rapid-growing vine, covering a large space in a short time. Fleshy, heartshaped leaves of a light green, and numerous racemes, of feathery flowers of delicious fragrance. A beautiful and popular vine. 5 cts. each, 40 cts . per doz.

## MONTBRETIA CROCOSMIFLORA.

This is one of the most floriferous and showy of summer-flowering plants, and destined to great popularity. Planted 6 inches apart in a group in a sunny position and allowed to remain undisturbed for several years, they form magnificent clumps, producing, in great numbers, graceful spikes bearing from 18 to 30 showy star-shaped flowers of orange suffused with red. They flower freely the first seaşon, 50 cts. doz. $\$ 4.00$ per 100.

## PAEONIES.

We can furnish these well known old favorites in all the newest varieties. Hardy Herbaceous Varieties Named, 50 cts . each.
"" "، Large Roots, various colors, mixed, 25 and 50 cts. each.
Tenuifolia, FI. P1. Large double crimson, fern like foliage, 50 cts. each.
TIGRIDIA. (Shell Flower.)
Curious and beautiful shell-like flowers about four inches in diameter, flowering from July to October. The bulbs can be planted about the middle of May, and taken up in October and kept over winter in dry sand.

Each Doz.

excelsior tuberose.

## TUBEROSES.

One of the most delightfully fragrant flowers. Invaluable for bouquets, button-holes and wherever cut flowers are in demand. Before potting the bulbs, remove the small offsets. Use good, rich loam, and start in a hot-bed or forcing pit. They should not be set in the garden till June.
Excelsior Double Pearl. Mammoth Bulbs. A superior strain with very large white flowers, produced in great abundance. Per Doz. 30c.; per $100 \$ 2.00$.
Tall Double. Very free blooming; splendid. Per Doz. 30c.; per $100 \$ 2.00$.

Periploca Græca. (Silk Vine.) A handsome and vigorous growing vine .....  35
Wistaria, Chinese Purple. The finest of climbing plants; purple flower. .....  50

CLEMATIS. GROUP.

## CLEMATIS.

The most beautiful class of hardy flowering climbers. The plants offered by us are fine and strong.
Henryii. Pure white, extremely large flowers, with eight petals.
Jackmanii. One of the best; fine rich purple.
Jackmanii Alba, One of the finest pure white forms.
Kermesiana. Crimson, in great protusion.
The above large-flowering varieties, 50 c , each. Extra strong plants 75c. each.
Clematis Davidiana. A stout, Each. upright perennial, 3 feet high, with numerous porcelain blue blossoms; fragrant,hardy, very desirable

## Clematis Coccinea. Distinct

 variety, with brilliant scarlet flowers; small, thick, very numerous. Splendid acquisitionClematis Crispa. Delicate shade of blue; numerous flowers, beautiful
Clematis Paniculata. This lovely white variety, with its thousands of fleecy, small, star-like flowers, is one of the finest climbing plants known. It bears so profusely and in such dense but airy clusters that the whole plant appears as one mass of bloom with dark shining foliage enough only to give effect to its beauty. It is deliciously fragrant, a very rapid climber, flowers freely first year and is perfectly hardy. Large plants, each, 50c.; flowering plants, 35c. ; dozen $\$ 3.50$.

## FRUIT TREES.

## APPLES.

Price, 4-6 ft. asc. each, $\$ 2.50$ Doz. 6-8 ft. 5oc. each, $\$ 4.00$ Doz.
Our list includes such varieties as are best suited for the New England States.

SUMMER APPLES.
Early Harvest. Yellow. August.
Primate. Large, Yellow. August.
Red Astrachan. Red. August.
Sweet Bowgh. Yollow. August.
William'e Favorite. Deep red. August.
AUTUMN APPLES.
Alexander. Striped. October-November.
Fall Pippin. Yellow. October-December.
Gravenstein. Striped. September-October.
Maiden's Blush. Pale. October.
Porter. Yellow. Suptember.

WINTER APPLES.
Baldwin. Red. Unsurpassed.
Fameuse. Red. Flesh white.
Golden Russot. High flavor. Nov.-April.
Hubbardston Nonesuch. November-January.
King. Very large. Crimson and red.
Ladies' Sweet. Red and Yellow.
Mother. Large, striped.
Northern Spy. Large, delicious.
Rhode Island Greening. Excellent.
Roxbury Russet. Medium size.
Talman Sweet. Yellowish. November-Ap;il.

## PEARS.

Price, 2-3 years, 75c. each, $\$ 6.00$ Doz. 3-5 years, $\$ 1.00$ each, $\$ 10.00$ Doz. Larger Trees $\$ 1.50$ and upwards.

SUIITIER PEARS.
Bartlett. Delicious. September.
Clapp's Favorite. Large. August.
Rosteizer. Yellowish green. Small, fine.
Wilder Early. Very choice. August.

## AUTUMN PEARS.

Belle Lucrative. Melting and juicy,
Bosc. Large, fine. October.
Hardy. Russet. November.
Buffum. September.
Frederick Clapp. Large, best quality.
Loulso Bonne de Jersey. Fine. October.

AUTUMN PEARS-(Continued).
Seckel. Small, delicious. October. Sheldon. High flavor. October. Urbaniste. Large, fine pear. October.

WINTER PEARS.
Anjou. Large, fine. November.
Clairgeau. Handsome. November.
Dana's Hovey. Finest of all. December.
Duchesse. Very large and fine. November.
Lawrence. Excellent. December.
Vicar. Good for cooking. Keeps well.
Winter Nellis. High flavor. December.

## CHERRIES.

Price, 2-3 years, 75c. each, \$6.00 Doz. Large Trees \$1.50 and upwards.

Black Tartarian. Large and fine. June.
Black Eagle. Large, high flavor. July. Black Heart. Juicy and sweet. July.
Coe's Transparent. Amber, very fine. June. Downer's Late. Red, excellent. July.

Early Richmond. Dark red, good. June. Governor Wood. Yellow. one of the best. May Duke. Large, red, very fine. June. Rockport Bigarreau. Amber, rich. June.

## PLUIIS.

Price, 2-3 years, 75c. each, $\$ 6.00$ Doz. Larger trees $\$ 1.00$ and upward.

Bradshaw. Purple, excellent. August.
Coe's Golden Drop. Yellow. September. General Hand. Yellow. September.
Imperial Gage. Pale green. September. Jefferson. Oval, yellow, large.

Lawrence's Favorite. Green. August. Lombard. Violet red, good. August. Smith's Orleans. Reddish. September. Washington. Yellow, large, extra.

## PEACHES.

Price, 25c. to 75c. each, according to size. $\$ 2.50$ to $\$ 5.00$ per dozen.

Alexander. Red. Early July.
Amsden's. Red and white. July.
Coolidge's Favorite. White and red.
Crawford's Early. Unsurpassed. August. Crawford's Late. Splendid. September.
Early York. White and blush. August.
Foster, Red, excellent. August.

George IV. Large, juicy, sweet. September. Gross Mignonne. Excellent. September. Hale's Early. Medium size. July.
Old Mixon, Free Pale yellow. September.
Red Rare Ripe. Yellow and red, fine.
Stump-the-World. White and red. September.

## QUINCES.

Price, 50c. to $\$ 1.00$ each, according to size.

Champion Very large and tender.
Mammoth. Extra fine and large.

Orange. Large, golden-yellow.
Rea's Mammoth. Very large, splendid quality.

## SMALL FRUITS.

BLACKBERRIES. $\$ 1.00$ per Dozen; $\$ 6.00$ per 100 .

Agawam. Large, best quality, hardy. Dorchester. Large, glossy black. Kittatiny. Large and handsome.

Snyder. Fine quality, hardy, productive. Wachusett. Hardy, fine, nearly thornless.
Wilson's Early. Fruitsmall, fine quality.

CURRANTS. $\$ 1.00$ per Dozen except where priced.

Black Naples. Large black for preserves.
Cherry Red. Large, very productive.
Fay's Prolific. Largest and finest red variety; very prolific. \$2.00 Dozen.

Versailles. Large red, very productive.
Victoria. Large light red, very productive; fine quality, late.
White Grape. Large, the best white.

Downing. Light green, large and sweet. Industry. Dark red, very large and proHoughton. Pale red, very fine. ductive; fine quality. $\$ 2.50$ per doz. Smith. Light green, large oval.

## GRAPES, HARDY VARIETIES. 35c. each; $\$ 3.00$ per Dozen.

Brighton. Red, large and sweet.
Concord. Black, large, always reliable.
Delaware. Light red, bunches and fruit small, delicious quality.
Eaton. Black, very large, sweet.
Empire State. White, delicious quality. F. B. Hayes. White, large clusters, sweet. Hartford. Black, large and productive.

Moore's Diamond.White,large,excellent. Moore's Early. Black, large, fine quality. Niagara. White, large, and productive. Pocklington. White, large and sweet. Salem. Red, very sweet and tender. Vergennes. Red.bunches and berries large Wilder. Black, large bunches, sweet. Worden. Black, large, excellent quality.

GRAPES, Foreign Varieties. For growing under glass, $\$ 1.50$ to $\$ 2.50$ each.

Black Alicante. Large, fine, late keeping.
Black Hamburg. Delicious, best for general use.
Golden Hamburg. White, large, flesh melting.

Gros. Colman. Black, round, splendid late sort.
Muscat of Alexandria. Best white, delicious.

RASPBERRIES. $\$ 1.00$ per Dozen.
Brinckle's Orange. Large and delicious.
Cuthbert. Rich crimson, berries very large, one of the best.
Golden Queen. Large, firm, and of fine quality.
Gregg. Black-cap; large, hardy, and a vigorous grower; great yielder.
Hansell. Red, fine, very early and productive.
Marlboro. Red, very large, fine quality.
Souhegan. Black-cap; large, productive and hardy.
Turner. Red, medium size, sweet and juicy.

## STRAWBERRIES. $\$ 1.00$ per Hundred.

Barton's Eclipse. (P) Fruit large, conical, very firm.
Brandywine. (S) Bright red, very firm berries, excellent for general crop.
Bubach No. 5. (P) Large and productive, bright scarlet.
Clyde. (S) New, one of the best; scarlet. very productive.
Enormous. (S) Large size and good quality; deep crimson, very glossy, firm, solid.
Haverland. (P) Fruit large, of good form and fine quality.
Leader. (S) Very early; large size, firm, fine flavor.
Lovett (S) Large, uniform, bright crimson, good quality.
Marshall. (S) Large, rich crimson, fine flavor.
Timbrell. (P) Large, dark crimson, excellent quality, one of the latest to ripen.

## FERTILIZERS.

Clay's Fertilizer. This valuable imported manure is especially recommended to all who grow either fruit, flowers, or vegetables, and wish to bring them to the highest perfection. Should be used in potting soil and spread on staging of greenhouses planted with flowering plants, etc. Per bag of $25 \mathrm{lbs} ., \$ 2.00 ; 50 \mathrm{lbs} ., \$ 3.50 ; 100 \mathrm{lbs} ., \$ 6.50$.
Sheep Manure, Pulverized. This is a pure, natural manure, and the most nutritious food for plants. Its effect is immediate, much more lasting and healthy than grano or any other manure. It is the best of all manures for mixing with the soil for greenhouse plants. It makes the richest, safest, and quickest liquid manure, without any deleterious effects.

Directions.-For mixing with soil, take one part manure to six parts soil. For making a liquid, take one pound manure to five gallons of water, which can be used with safety daily if necessary. $10 \mathrm{lbs} ., 50 \mathrm{c} . ; 50 \mathrm{lbs} ., \$ 1.50 ; 100 \mathrm{lbs} ., \$ 2.50$.

Our Bone Fertilizers are prepared expressly for our trade; warranted strictly pure.
Bone Flour. Ground perfectly fine; excellent for pot plants or beds where an immediate effect is wanted. Per $100 \mathrm{lbs} ., \$ 3.00$; in barrels, about 175 lbs ., at $2 \frac{1}{2} \mathrm{c}$ c. per lb
Bone Meal. One of the best Fertilizers to use for general purposes. 10 lbs ., 50 c. ; $25 \mathrm{lbs} ., \$ 1.00 ; 50 \mathrm{lbs} ., \$ 1.50 ; 100 \mathrm{lbs}, \$ 2.50$; barrel, about $200 \mathrm{lbs} .$, at $21 / 4 \mathrm{c}$. per lb.

Bone, Coarse or Cracked. Ground coarse for grape borders or poultry. $100 \mathrm{lbs} ., 82.50$; barrel, about 175 lbs ., at $2 \frac{1}{4} \mathrm{c}$. per lb.
Guano Damaraland. A natural bird guano, equal in every particular to the old-fashioned Peruvian Guano of twenty years ago. 100 libs., $\$ 4.00 ;$ ton, $\$ 65.00$.
Complete Lawn Dressing. This is the best lawn dressing in the market. It is composed of finely pulverized blood, bone, potash, and refuse meat. The mixture supplies all the essential food elements requisite for the healthy growth of lawns, and is the cleanest of any to handle.
$10-\mathrm{lb}$. bag, sufficient for $1,000 \mathrm{sq}$. ft., $\$ .50 \mid 50-\mathrm{lb}$. bag, sufficient for $5,000 \mathrm{sq}$. ft., $\$ 1.60$

Stockbridge Special Clanures. These famous and invaluable fertilizers are well known throughout the entire country. The following are the leading kinds, for Potatoes, Corn and Grain, Small Fruits, Vegetables, Root-Crops, Asparagus, Top-Dressing Grass and Seeding-Down Grass. $100-1 \mathrm{lb}$. bag, $\$ 2.00$; ton, $\$ 38.00$.
Bowker's Hill and Drill Phosphate. A valuable fertilizer which can be used with equal profit for the hill or drill or sown broadcast. It is one of the richest and quickest acting fertilizers, and may be profitably used on any soil. $50-\mathrm{lb}$. bag, 81.25 ; $100-\mathrm{lb}$. bag, $\$ 1.75$; ton, $\$ 34.00$.
Bowker's Lawn and Garden Dressing. A special fertilizer prepared from chemicals, free from weed seeds, almost odorless, clean to handle, and easily applied.

Trial bags for $1,000 \mathrm{sq}$. ft., $\$ .50 \quad 50-\mathrm{lb}$. bags for $5,000 \mathrm{sq}$. ft ., $\$ 1.75$ | ", 2,500 ", 1.00 | $100-\mathrm{lb}$. " " $1 / 4$ acre, 3.00 |
| :--- | :--- | :--- |

Bowker's Greenhouse Dressing. Specially prepared as used by Prof. S. T. Maynard, of the Massachusetts Agricultural College, and containing the chemicals recommended by him in his recent address before the National Florists' Convention. Bag, for 100 plants, one year, $\$ 1.00$. Quotations for large quantities on request.
Unleached Hardwood Ashes. As a fertilizer for lawns, gardens, and fruits Hardwood Ashes are unequaled; they are not a mere stimulant, but supply natural plant rood, permanently enriching the soil. Clean, free from offensive odor, and can be applied by any one. They are exceedingly valuable for lawns, imparting a rich, dark shade of green and destroying many of the insects which are so injurious. In barrels, ton, $\$ 18.00$; barrel, $\$ 2.50$.
Bradley's Superphosphate. This well-known fertilizer has been a standard fertilizer for years. It quickens the growth of the crop and brings it to earlier maturity. 100 lbs., \$1.75.

Sulphate of Ammonia. (Best grade) $243 / 4$ to $251 / 2$ per cent. ammonia. 10 lbs ., 60 c .; $100 \mathrm{lbs} ., \$ 4.00$.
Muriate of Potash. 80 to 85 per cent. $10 \mathrm{lbs} ., 50 \mathrm{c} . ; 100 \mathrm{lbs} ., \$ 2.50$.
Nitrate of Soda. 95 to 98 per cent. pure. $10 \mathrm{lbs} ., 50 \mathrm{c} . ; 100 \mathrm{lbs} ., \$ 2.25$.
Sulphate of Potash. 50 to 55 per cent. sulphate of potash, 35 to 40 per cent. sulphate of magnesia, and not over $21 / 2$ per cent. chlorine, excellent for potatoes and small fruits. 10 lbs., $40 \mathrm{c} . ; 100 \mathrm{lbs}$., $\$ 2.00$.

Land Plaster. For destroying bugs on cucumber, melon, and squash vines. 5 lbs., 15c.; $25 \mathrm{lbs} ., 50 \mathrm{c} . ; \mathrm{bbl}$, $\$ 2.00$.

## Tying Materials; Florists' Supplies.

Roffea. The best material for tying plants; exceedingly strong, soft, pliable. Lb. 30c.
Silkaline, or Smilax Green Thread. Largely used for tying bouquet work. Reels, 2 āc.
Cotton Batting. For packing; large sheets. Each, 6c.
Grafting Wax. The finest quality made, put up in neat packages with directions for use. $1 / 4 \mathrm{lb} .10 \mathrm{c} . ; 1 / 2 \mathrm{lb}$. 15 c . ; 1 lb . 30c.
Twine, Soft. For tying vines, etc., very strong. Large balls, 25c.
Tarred Yarn. Excellent, low priced materials for raspberries, shrubs, etc. Lb. 12c.
Tarred Marline. Of better quality than the above; twisted in strands. In 5 and 10 1b. balls. Lb., 18c.
Tinfoil. For bouquets. Price variable. Lb. 16c.
Bouquet Wire. Florists' bright. Nos. 23 and 24, per stone of 12 lbs., $\$ 1.30$.
Bamboo Canes. Japanese, very light and strong; about 5 ft . long. $\$ 1.00$ per 100 .

## INSECTICIDES.

Nicoticide Fumigating Compound. This liquid preparation is used for destroying green and black fly, thrip, mealy bug, red spider, etc. It may be used with every confidence in houses containing the most tender plants in full bloom, without the least damage to either foliage or flowers, and for this reason it is a great boon to growers of all kinds of tender plants, which are subject to the attacks of aphis. The vapor given off by the compound does not alter the natural color or scent of the flowers. 1 pt ., for 32,000 cubic feet, $\$ 2.50 ; 1 / 2 \mathrm{pt}$., for 16,000 cubic feet, $\$ 1.25$; $1 / 4 \mathrm{pt}$., for 8,000 cubic feet, 70 cents.

Fumigators for Vaporizing. Stand, pan, and lamp, 50 cents each.
Aphis Punk, Nikoteen. A special preparation of nicotine for the extermination of green and black fly, thrip, etc., contains no ammonia, and does not injure delicate plants. Per box of one dozen rolls ( 720 grains nicotine), 60 cents.

Bug Death. A patented, non-poisonous powder, entirely different from anything yet offered for the purpose, and as effectual as Paris Green. It is sure death to the potato, squash, and cucumber bugs, currant and tomato worms, also other plant and vine eating pests. If used according to directions injury cannot result to the most tender plants, and it has a tendency to assist growth. For potatoes a $121 / 2-1 \mathrm{~b}$. package is sufficient for an acre. For spraying trees it has no equal. 1-lb. box, 15 cts.; $3-\mathrm{lb}$. box, $35 \mathrm{cts} . ; 5-\mathrm{lb}$. box, 50 cts. ; $121 / 2-\mathrm{lb}$. box, $\$ 1.00 ; 100-\mathrm{lb}$. case, $\$ 7.00$.

Perfection Shaker, 65 cents.
Cow=oil=ene. Fly-oil for Cattle and Horses. This gave great satisfaction last season; it is absolutely harmless, easily applied, and a sure preventative. Per gal., \$1.00. Sprayer for same, 50 cents.

## INSECTICIDES.

NH4Nikoteen is composed of that element in tobacco which gives its value as an insecticide and nothing else. The best Extracts of Tobacco contain from $1 \frac{1}{2}$ to $21 / 2$ per cent. of nicotine. This preparation contains 40 per cent. nicotine. Is the cheapest, cleanest and most effective of insecticides and will not injure or discolor delicate plants. Pint bottle, $\$ 1.50$.
Thymo-Cresol. A highly concentrated and powerful preparation for dipping or washing SHEEP, and for ridding all Live Stock of Parasitic Vermin. It forms a Perfect Sheep Dip, as it is rapidly fatal to all the insect pests which infest domestic animals, but is at the same time quite harmless to the animals themselves and to man. The method of preparation is extremely simple, as it mixes at once with either cold or warm water. It contains principles which promote the growth of the wool. "The only successful sheep dip in use." Pint, 45 cts.; one-half gallon, $\$ 1.00$; gallon, $\$ 1.75$.
Fir-Tree Oil. A preparation for destroying insects and parasites, such as mealybug, red spider, scale, thrip, green fly, fleas, etc. It answers every purpose as an insecticide, and when used as a wash for dogs or animals is harmless to the hands and skin. Full directions with each can. Half-pint, 50 cts.; pint, 75 cts.; quart, \$1.25; half-gallon, \$2.50.
Tobacco Extract Rose Leaf. A perfectly pure, highly concentrated extract of Tobacco, always uniform in strength of Nicotine poison. Destroys green fly, mealy bug, thrip and red spider. Pint, 30 cts.; quart, 50 cts.; gallon, 1.50 ; 5 gallons, 85.00.
Tobacco Soap, Pinners. Manufactured from the essential oil of tobacco, for the destruction of all insects, parasites and their eggs. One-half lb., 25c.; 1b., 40c.
Tobacco Dust (Pure). A sure remedy for green fly, cheaper than snuff and quite as effectual. 5 lbs., 25 cts.; $100 \mathrm{lbs} ., \$ 4.00$.
Tobacco Dust and Sulphur. Prevents and cures mildew, kills green and black flies and other insects; has the double advantage of being a fertilizer as well as an insecticide. $1 \mathrm{lb} ., 10 \mathrm{cts}$; $100 \mathrm{lbs} ., \$ 6.00$.
Tobacco Stems. For fumigating. Invaluable as a mulch for rose beds, lettuce beds, etc., where insects frequently do much injury to roots or foliage. The best quality of stems supplied. Per barre1, $\$ 1.00$; in bales, 2 cts . per lb.
Little's Antipest. A safe and sure preparation for the destruction of all insect pests, equally suitable for Greenhouse, Garden and Orchard. Pint, 60 cts.; quart, $\$ 1.00$; gallon, \$2.50.
Bordeaux Mixture, Lion Brand. A valuable and indispensable fungicide for grape growers, ensuring larger crops and finer grapes, and preventing failure. Successful against black rot, mildew and rust. Being in liquid form it is very convenient to handle. One gallon will make fifty gallons of spraying liquid. Quart, 40 cts ; gallon, \$1.00.
Paris Green. "Lion Brand," new process. This will be found superior to any other Paris Green yet offered; it is lighter in weight for a given quantity and more soluble. It is stronger in active poison, and adheres better to the foliage. Per lb., 25 cts.
Whale Oil Soap. For destroying insects on plants, trees, vines, etc., and for washing the bark of trees. $1 \mathrm{lb} ., 15 \mathrm{cts}$; $5 \mathrm{lb} ., 50 \mathrm{cts}$.
Flour of Sulphur. Prevents and cures mildew on plants. Lb., 8 cts.
Hellebore Powder. One of the best insecticides for Green Fly, Rose Slugs, Currant Worms and other insects. Lb., 30 cts.
Persian Insect Powder. It is invaluable to the housekeeper for the destruction of Flies, Fleas, Roaches, and other insects. Lb., 50 cts.

## INSECTICIDES, Etc.

Slug Shot, Hammonds. One of the cheapest and best powders for destroying the cut worm, potato bug, rose bug, rose slug, curculio, worms or caterpillars upon vines, tobacco, cotton or egg plants, currants and fruit trees. Is an excellent fertilizer, contains nothing injurious to domestic animals, and does not deteriorate by age. On low growing plants, it should be dusted on with a very fine sifter. On tall shrubs and trees, it should be applied with a bellows. Price, five lbs., 30 cents; ten lbs., 50 cents.
Grape Dust, Hammonds. A preparation for destroying mildew on grape vines. Can also be used on plants or trees affected with mould, mildew or rust mites, either in greenhouses or the open air. Its diffusibility is great, one part of Grape-dust will spread itself over a greater surface than sulphur. To be thoroughly effectual, it must be applied frequently by dusting, as atoms of fungi are always spreading or floating. Apply at the first appearance of trouble. Dust on a warm, dry day. Price, five lb. package, 35 cents.

## IIORRILL'S CANKER WORM EXTERIIINATOR.

A Sure Protection for Fruit and Ornamental Trees from the Ravages of the Grub and Canker Worm.

As easily applied as paint or whitewash, by first placing a band of tarred paper six inches in width, securely fastened, around the tree, four feet above the ground, and covering the paper thoroughly with the Exterminator, using a common paint brush.

## POULTRY SUPPLIES.

Beef Scraps. Selected extra choice stock
Bone, Coarse or Cracked. Pure
Bone Meal. Pure, for young chicks.
Ground Oyster Shells.
Sunflower. Large Russian
Charcoal. Powdered . . . . . . . . . perlb.
Drinking Fountains. Stoneware. $\frac{1}{2}$ gallon, 35 cts. $\dot{1}$ gallon, 45 cts. 2 gallons, .55
Nest Eggs. China
CANADA HARD WOOD ASHES. Indispensable as a lawn dressing, or to apply to orchards. They should be applied late in fall, or early in spring, so that the rains and snows may leach the ashes and carry the elements down to the roots of grass or trees. Our ashes are screened and in proper condition for immediate use. Apply at the rate of 1000 to 1500 lbs . per acre. Per barrel, $\$ 2.50$; per ton, $\$ 18.00$.

## LAWN MOWERS.

As our business is contined entinely to the best trade, that demand the best goods, we have decided to handle none but Coldwell's make of Lawn Mowers for the coming season. We have sold these during the past 6 years with better results than any other make, and we can thoroughly recommend them to be the best made, lightest running and best cutting machine on the market. The Horse Mower and Imperial Hand Mower are so well known that it is useless to comment on them here.

The Chain Roller Mower has been in use on the leading Golf Links during the past 3 years, and have proven themselves to be the best machine for this work. Those are the only machines made especially adapted to border cutting.

The Motor Mower is the latest invention of Mr. Coldwell; it cuts a 40 inch swarth, cost of fuel is 40 cents for 10 hours. For large places, where perfection of lawn is required, this machine not only cuts and rolls ihe lawn, but the engine, which is of four horse-power, can be utilized for cutting wood, pumping water, threshing or other work, without removing it from the Lawn Mower.

Absolute guarantee with every Lawn Mower. Satisfactory in every respect or no sale.

## " COLDWELL", IMPROVED

## HORSE LAWN MOWER.

They are furnished with shafts, seat and side draft attachment, which keeps the horse on the cut grass only. Each Mower warranted to give complete satisfaction. The new attachment for instantly raising the knives when traveling along roads and stony places is very convenient.

The best Lawn Mowers in the market. The principal feature of these machines is that the bottom knife-bar is bolted to the sides, thas making the frame perfectly rigid, while by a new patent hanger the revolving cutter is adjusted to the bottom knife. This is the reverse of the adjustment in all other mowers. When the knives are properly adjusted a lock screw secures them in position.

## Coldwell's Chain Roller Mower for Golf Links and Borders.

In addition to the usefulness of this Mower for regular lawn work, it will perfectly cut the grass on borders, even though they are narrow strips of sod between flower-beds and walks, where a side-wheel Mower would have one wheel off the border.

The Chain-Roller
lower is strictly
high g r ade and
should last for years.
The chain, in place
of gears, reduces the
noise and friction.
The Self-Dumping
Grass Catcher is the
best ever used.

Couplings with bands, each, $\quad$. Pitcher Spout Pumps, Copper Pumps, Iron Force Pumps.

## COOPER HOSE MENDER.

No mechanical skill required to mend your hose. Cut out defective place in hose with sharp knife, leaving ends as square as possible, thus

insuring close union. Dip ends in water if not already wet. Insert Mender a short distance at one end, then take the other piece of hose and do likewise. Take hold of each piece and push them on together, having them meet at center of Mender. If hose does not go on readily, it can be twisted back and forth, until it meets, as above mentioned. Do not expect it to go on too easily, as there is great difference in the stability of hose, according to length of time it has been in use, and also the quality.

Persons following these directions will find after one trial that they make the hose as good as new, and with a few of them in their house when in need will cause the hose to last twice as loug. Simple, effective, and practically indestructible. Always stop the water at faucet, but never at nozzle. unless you want to spoil your hose, as the pressure to the square inch will range from fifty to ninety pounds. Price, $\$ 1.00$ per doz.

Pump,"Handy Knapsack." Made entirely of brass and copper, with ball valves and metal plunger, allof which are easily accessible, and can be, therefore, readily examined and repaired. It is so arranged and stayed in the reservoir that it is capable of doing long and continuous service. The discharge is at the bottom, and the pump can be entirely drained of the liquid. $\$ 15.00$.

HAND FORCE PUMP.

WATERS' TREE PRUNER.

## THE AQUAPULT HAND FORCE PUIIP.

For washing windows and carriages, watering gardens and lawns, sprinkling walks and plants, and for applying liquids to destroy insects, this pump is the best manufactured. It is well made, of the best materials and nicely finished.

Price, \$4.50

## BORDEAUX BRASS SPRAY PUMP.

Especially designed for spraying in gardens and greenhouses. The pump is double-acting and all brass, with malleable iron foot rest. The ball valves of Gutta Percha are proof against the action of acids and oils. The pump end of discharge hose is wire wound, adding largely to its durability. Price, $\$ 4.00$.

BORDEAUX.

## Waters' Improved Tree Pruner.

It is the only pruner that will clip the slightest twig on extreme end of the limb; it will also cut larger wood than any other device that is practicable to handle. It weighs less, costs less, and lasts longer, reaches higher, works easier, does more and better work than anything ever before used for pruning.
Length of pole, 4 feet,

Sod Lifter. Useful for cutting under strips of sod as they are being rolled.

Wood Handle, $\$ 3.00$. Iron Handle, $\$ 2.75$. sod lifter.
Spades, Superior Steel, Long Handle. Extra quality, $\$ 1.00$.

Sprayer Insect Exterminator Simple, practical, effectual. By far the most economical as well as the most effectual device for applying paris green, with little labor. Paris green applied with the Electric will kill potato bugs, all sizes and all ages, every time, and only one pound required for an acre of potato vines.
Experience has proven that paris green applied in its pure, unadulterated state does not injure vines, and is far more effectual than when mixed with plaster or any other substance. Every farmer who once tries the Electric in killing potato bugs will never do without it. Each, $\$ 1.00$.
Improved Electric
Sprayer. Especially
recommended for spraying all kinds of plants, bushes, vines, and shrubs. The great improvement of this sprayer over others is that it can be used as well for powder as liquids and its moderate cost. Tin, each, $\$ 1.00$; Copper, each, $\$ 1.25$.

Sprinkler, Scollay's Rubber. Made of rubber, with flat bottom, and a detachable brass top, finely perforated. Each, $\$ 1.00$.
Sprinkler, Scollay's Angle. For sprinkling under side of the leaves, designed for applying liquid insecticide or water. Price, $\$ 1.00$.

Sprinkler, Columbia Rubber. The bulb is made of soft rubber, the top of hard rubber with detachable screw cap, and is extremely useful for all purposes to which a sprinkler is put. Large size, 75 c .; medium size, 50 c .
Putty Bulb, Rubber. For applying putty to sashes. The putty in a semi-liquid state is ejected by pressing the bulb, enabling one to do the work very rapidly. Price, $\$ 1.00$.
Squilgees or Rubber Mop. Edged with pure rubber, 75c.

## PLANT STAKES.

The Round stakes are light, very neatly turned, tasty, and suitable for plants in pots, also for Carnations, Gladiolus, and various other plants, in the open ground.

The Square Stakes are suitable for tying up Roses, Dahlias, Climbers, etc.

Green Painted Round Stakes, Lignt.

Cane Stakes. These resemble the bamboo, and are strong and durable; much used by florists for tying plants requiring strong but light stakes. They vary in length from four to ten feet, and can be cut to the desired length. Per bundle of about 250, \$2.50.

Stakes, Square. Unpainted, made of hard wood and neatly finished.

Brass Syringes. No. 10. Barrel, $18 \times 1 \frac{1}{2} \mathrm{in}$.; two spray roses and jet, with patent valve, $\$ 5.50$.

No. 11. Barrel, $18 \times 1 \frac{1}{2}$ in. ; two spray roses and jet, $\$ 4.50$.
No. 12. Barrel, $14 \times 1 \mathrm{in}$.; " " " " " 3.25 .
No. H. Barrel, $18 \times 1 \frac{1}{2}$ in.; with one spray, $\$ 2.25$.

## THE BOSTON ROSE SPRAY HOSE NOZZLE.

For the greenhouse, flower garden, hot-bed or lawn, it has no equal. It allows the water to flow freely and does not strain the hose. It works perfectly, is well made, and is just what is wanted by everyone using a hose. Price 75c.
Thermometers. All tested and guaranteed. Japanned Tin Case. 8 in .15 c .;
10 in .25 c.
Thermometers. Japanned Tin Case. Extra Quality. 8 in. $50 \mathrm{c} . ; 10 \mathrm{in} .60 \mathrm{c} . ; 12 \mathrm{in} . \$ 1.00$. Thermometers, Self-Registering. These register accurately, the coldest, also the warmest point of temperature, $\$ 2.50$.
Thermometers. Hot-Bed or Plunging, $\$ 1,75$.

Torch, Caterpillar. Made of Asbestos, which when saturated with kerosene oil and lighted proves most effectual in destroying caterpillars and does not injure the tree. Each, 50c.
Tree Scraper. Blades
fastened by square head machine bolts, hardwood handles, 50c.
Trowels, Garden. Extra forged steel, strong curved. Solid steel blade and shank, 6 in. 40 c . 7 in. 50 c.
Trowels, Garden. Common steel blade, 6 in . 15 c .; 7 in .20 c .
Trowels, Cleve's Angle. Admirably adapted for transplanting, digging weeds in lawns, etc., 25 c .
Trowels, Flat Steel. Best quality steel, extra strong, 75 c .

Wagon Jack, Prescott, IX L. The best Jack made.
No. 1. For light carriages, $\$ 2$ 25. No. 2. For light wagons, $\$ 2.75$. No. 3. For heavy wagons, $\$ 4.50$.
Watering Pot, Galvanized. Made from best quality iron and heavily galvanized after being made. The handles, etc., are riveted on and a heavy iron band on the bottom makes it well nigh indestructible. Two copper-faced roses go with each pot for fine and coarse watering. Prices, each, 6 qt. $\$ 1.75$; 8 qt. $\$ 2.00 ; 10$ qt. $\$ 2.25$; $12 \mathrm{qt} . \$ 2.75$.
, teavy Tin Watering Pots. Nicely painted green. Made of extra strong, double-
 thick tin, braced and stayed; very substantial: 2 quart, $60 \mathrm{c} . ; 4$ quart, 7 5.c.; 8 quart, $\$ 1.00 ; 10$ quart, $\$ 1.25$ : 12 quart, $\$ 1.50 ; 16$ quart, $\$ 2.00$.

WEEDER, Excelsior. Useful for loosening the soil in borders and beds. Each, 15c. Hazeltine. Steel blade, similar to Lang's in shape, but larger. Each, 30c.
Lang's. A most useful and practical little tool, with leather band holder, so that the fingers may be free to pull weeds or thin plants. Each, 25 c.
Noyes. Steel. Cutter, diamond shape, well tempered and made. Earh, 2.re.

Whiffletrees. Selected ash .
$\$ 0.60 \mid$ Eveners. Selected ash $\$ 1.25$ Neck Yokes.
1.003 Horse Eveners and Whiffletrees.
per set
cast steel. Per lb. 7c.
Square head, solid cast steel. Per lb. Te.
Truckee pattern, solid cast steel. Per lb. 10 c .

## WATER BARREL TRUCK.

This truck is a great improvement upon all trucks hitherto offered. By means of a simple arrangement of the Axle, the Barrel can be detached at pleasure, whether full or empty. Any desired number of Barrels can be used with the same truck. This contrivance is very useful for carrying water to the garden or lawn during dry weather, for emptying cesspools, and for innumerable other purposes.
Water Barrel with Truck complete, $\$ 10.50$ Water Barrel with Trunions, $\$ 2.75$. Box or Cart, with Trunions, $\$ 3.50$.
STEEL DRAG SCRAPERS.

Our scrapers are shaped from a single sheet of cold steel, being lapped and riveted at the corners, thereby rendering them uniform in thickness throughout, except at corners, where they are of double thickness.
No. 3-Capacity, 3 cubic feet of earth;
weight, 85 lbs. $\$ 7.00$
No. 2-Capacity, 5 cubic feet of earth; . . . . . weight, 95 lbs 7.50
No. 1—Capacity, 7 cubic feet of earth; extra heavy steel plates; weight, 105 lbs. 8.00

## THE NEW MODEL SEED DRILL.

This we consider the simplest and best drill on the market. The diamond-shaped adjustable hole regulates the discharge, and can be made larger or smaller, as occasion requires. No other drill has this advantage. The seed cut-off claps up underneath the hole; it does not slide under the same, as in other similar drills; on this account it does not clog nor cut the seed. It has a broad wheel and a covering roller. The opening plow is adjustable in depth. The whole make-up of the drill is simple. It can be worked by any one. Price, $\$ 7.00$.

## Eclipse Corn Planter and Fertilizer Distributor Comb'd.

fertilizer is droped ear side of seed. A great advan the seed, jus berore the a dry season. Price, $\$ 25.00$.

For planting Field or Ensilage Corn, Beans, Peas or Beet Seeds, in hills, drills or check, will accurately distribute all Commercial Fertilizer, Wet as well as Dry, Pulverized Hen Manure, Plaster, Ashes and other fertilizers of like consistency, with a certainty. Has concave places each side of plow, which are of great importance in placing moist earth on the seed, just before the

## The Universal Weeder and Cultivator.

A perfect weeder for all hoed crops, and does away with the use of the hand hoe.

For putting in grain, grass seeds or millet, it has no equal; distributes the seed evenly and at a uniform depth, at the same time pulverizing the soil and forming a perfect seed bed.

We recommend the Weeder to all Market Gardeners as an implement well adapted to
 perform many kinds of work which generally takes a great deal of time.

Easy to operate. Light to handle. A great saver of time and money. Permanent Tooth Weeder, $\$ 6.50$. Removable Tooth Weeder, $\$ 8.00$. Send for special descriptive circular.

## THE "IRON AGE" DOUBLE WHEEL HOE.

The garden or farm is incomplete without at least one of these tools. In cultivating onious, beets, turnips, radishes, etc., it is invaluable; saves hours of hard labor and does the work better than several men could do it in the same time. One great advantage which this double wheel hoe possesses is that it can be made into a practical single wheel hoe in a moment's time. An axle is sent with every double wheel hoe for this purpose. The wheels are 16 ins. high, enabling the wheel hoe to run easy and without yielding to the depressions of the soil, as a low wheel will do. The frame being made of tubing coupled to malleable castings gives great strength, together with lightness. Complete with all attachments, Rakes, Plows, Cultivator Teeth, $\$ 6.50$. Plain, with hoes only, $\$ 4.00$.

## THE "IRON AGE" SINGLE WHEEL HOE, CULTIVA= TOR, PLOW, AND RAKE.

This tool is, in regard to the work done, almost a counterpart of the Double Wheel Hoe, and the same remarks as to its construction, extreme lightness, and ease of operation will apply with equal force. In addition, its lower price, less weight, and increased steadiness given by a single wheel make strong arguments in favor of this tool. For the small kitchen garden we consider the single wheel hoe very valuable. The work is done principally between the rows, although the plants of small growth can be hoed on both sides at once by placing the wheel on the left side. With this single wheel tool, spaces of exceedingly narrow width can be worked, even using but one cultivator tooth. With the large plow attachment, deep furrows can be opened or closed; potatoes, celery and other crops hilled; in short, all such work usually accomplished by a special plow. Packed weight, 28 pounds. Price, $\$ 5.00$.

We also have a weeder attachment for this tool similar to the ones used on the Double Wheel Hoe, a capital thing. Price, $\$ 1.00$.

## ADRIANCE BUCKEYE MOWER.

Roller Bearings. Light and flexible; floating bar, free to adapt itself to all variations of the ground. Wide Tread leaves the cutgrass in best condition. Spring Draft is automatically changed and is applied as it should be under all circumstances, easy for the team, safe for the driver. Draft always the lightest possible. Best Lifting Levers, easy to use by hand or foot. Comfort for the operator. The longest and best Pitman, adjustable at both ends, easy steady motion. All weight on Driving Wheels. The driving wheels stay on the ground when the bar strikes an obstruction. This means safety for the driver.

The ever reliable Adriance Buckeye Mower. Simplest and best. Large Driv= ing Wheels. Perfect Balance. Full Folding Bar.

Send for special descriptive Catalogue and prices.
Sections for all makes of Mowers and full line of Repairs for all leading Mowers.

The world's standard Hay Rake is here presented to the consideration of users. Many hundreds of thousands of these rakes are in use gathering up more of the world's hay crop than any other brand.

Sizes : The Tiger is made in sizes, $8 \mathrm{ft} ., 24$ and 26 teeth, with teeth 3 or 4 inches apart. Wood wheels are the regular equipment.

The guideboard in the Tiger preserves the alignment of the teeth during the whole life of the rake. Short holds in iron sockets soon wear, and allow the teeth to trail out of line.

Continued solid steel axle, ratchet pawls, and spring in each wheel, which renders the Tiger Rake the strongest, the easiest to operate of any rake manufactured. Agents wanted. Price on application.

The Tiger Tedder is built on correct lines to fill all conditions in the case. It is neat, easy running, easily handled, and does its work well in all conditions of land and crop.

The Frame Relief Springs are unique and invaluable. The fork springs are large, long-lived, and exactly suited to the conditions. The fork arm is tubular, and the tines are so shaped as to clear every obstruction and also to get all the hay.

The Draft is very light. Not an ounce of power is wasted. The line of draft is at exact center of ground wheels, the thills being simply a continuation of the draft arms. The entire machine is under complete control of the operator. The slightest movement of the lever produces the effect intended, making it possible to adjust the forks at any desired height above ground. This is a great advantage, particularly on rough, hilly land. The Tiger can be swung up and down easily and quickly, so as to ted all the hay. Thrown in and out of gear by lever operated from driver's seat.

We are New England Headquarters for the SYRACUSE CHILLED PLOW CO., and carry in stock a full line of Plows, Harrows, Cultivators, Drag Scrapers, Wheel Scrapers, Steel Wheelbarrows, Canal Barrows and Hand Push Carts. Also a full line of repairs in stock.

# SYRACUSE ALL STEEL=FRAME DISC HARROW. 

# For Crushing Clods, Pulverizing Hard=Baked 

Clay Land, or Cutting up

Sod Ground

# No Harrow Rivals the 

New Syracuse.

#### Abstract

We show in the above the new Syracuse Steel-Frame Disc Harrow with double lever. The Frame, both in the crosshead and gang beams, is made of double bars of highly tempered angle steel, giving both strength and rigidity. Attached to the Frame are steel arms which connect the bearing boxes. Each Gang has a double-jointed hinge which acts vertically and horizontally, giving flexibility and free action when working on uneven ground. By means of the adjustable hold-down casting at the inside ends of the Gangs, the Harrow can be made to cut at a uniform depth the full length.

Draft.-The Harrow draws direct from the axle, which, in connection with the excellent bearings of the Syracuse, obviates all tendency to side draft or neck-weight of the pole.

Levers.-The Levers are placed within easy reach, and each Gang moved separately, so that they are easily operated. The Gangs can also be set at different angles, when necessary, which is an invaluable feature when working on side-hill or rolling land.

The Scrapers of the Syracuse are known as the individual Gang Scraper, one for each Disc, with shanks of tempered spring steel, with long controlling rod, held in position by a secondary spring, and operated by a pivoted foot treadle at the end.

Discs.-Oil-tempered Steel Discs, either round or cut, are furnished, the latter being sent only on special orders.

The Hitch.-As shown in our cut above, the Harrow is arranged for a two-horse hitch, but we furnish same with three or four horse hitch if so specified. For the threehorse hitch we furnish an extra crossbar and whippletree to be attached to the side of the pole by an extra casting, thus making a perfect arrangement and avoiding all side draft.

We furnish the cut-away Disc as well as the plain ones when so desired. The following sizes are furnished: 1216 -inch Discs, cuts $61 / 2$ feet. 1216 -inch Cut-away Discs, cuts $61 / 2$ feet, complete.

## REPAIRS.

We carry a full line of repairs for all the leading Plows, Cultivators, Harrows, Mowing Machines, Rakes, Tedders, etc.

We have greatly enlarged our repairing department, and with our skilled mechanics, who have had many years' experience at this kind of work, we are now placed in the best possible position for repairing of all kinds of farm and garden tools and implements. We devote special attention to this feature of our business, and can do first=class work at reasonable prices.

We make a specialty of repairing Lawn Mowers, and, as we carry a complete stock of repairs for all leading machines, we are enabled to ship promptly and guarantee every machine we repair to work in a satisfactory manner.
